

SafetyOS

The Challenge: Developing Required Safety Training

Safety is imperative for all businesses, but especially carwashes. Equipment, chemicals, electricity, and water can introduce a potentially dangerous environment to employees. Carwash operators have the responsibility of maintaining a safe environment. This leaves operators the task of developing, implementing and managing a carwash safety program even though they may not have the expertise to do it effectively. These challenges include:

- **Providing regulatory safety training**
- **Basic online safety programs are not designed exclusively for carwashes**
- **Implementing a carwash safety program can be difficult and time-consuming**

Advantages of SafetyOS

- **Assure Safe and Healthful Conditions**
SafetyOS gives carwash management the basis for fulfilling local, state, and federal regulations. Historical training information is tracked to document the safety training for OSHA, legal and worker's compensation purposes.
- **Designed Exclusively for Carwashes**
This safety training system focuses on the carwash industry and can be molded to be site-specific. The assessment at the end of each section ensures that employees understand the topic before moving on.
- **Easily Implemented**
The Learning Management System (LMS) platform allows employers to effortlessly manage and track employees' progress.

What SafetyOS Delivers

A 12-part, carwash-specific safety training series, that includes video training, helps educate employees on the significant aspects of carwash and equipment safety.

The Results

Educating staff in carwash safety is a priority and goes a long way in creating a safe working environment and mitigating risk.

Outputs

- **A 12-part interactive text and video-based training program** using LMS (Learning Management System).
- **Assessment testing** on each subject for each employee. Reports and scores are stored in LMS for you to access.
- **A comprehensive lockout/tagout program.**
- **Safety forms** include OSHA Reporting Guidance, a Safety Inspection, and LOTO forms.
