

TrainingOS

The Challenge: Implementing a Carwash Training Program

Developing a comprehensive and effective training program for a carwash is time consuming. It can take years to develop the training materials, documents and tracking needed to ensure that employees have the knowledge to operate the carwash in a safe and successful manner. Without training:

- **Attendants get discouraged and lack motivation**
- **Customer service is poor**
- **Workers quit because they feel unprepared**

Advantages of TrainingOS

- **Increase Knowledge and Skills**
When employees are trained correctly, they are motivated to use company resources effectively, leading to better cost control.
- **Gain Confidence**
A well laid plan allows employees to focus on providing customers with an excellent experience, leading to loyal clients that will return.
- **Retain Staff**
Uninformed workers are at a higher risk of leaving. Proper training gives them the tools to work efficiently and be more satisfied.

What TrainingOS Delivers

TrainingOS is a comprehensive training program for attendants, the site management team, and above store leaders. It provides a roadmap to train employees in basic to advanced skills, increase their confidence levels, and help retain your employees and customers.

The Results

A consistent and effective training process that helps your team develop the skills needed to run a successful carwash.

Outputs

- **An interactive text and video-based training program** using LMS (Learning Management System).
- **Attendant training** on customer processing, wash and club packages, cleaning and more.
- **Management training** on employees, performance, customers, equipment, controllable expenses and more.
- **Point of Sale training**
- **A training tracking system** that allows you to track the training progress for each employee and manager.
