SERVICE

- Inspections (OSHA)
- Load Test Certifications

Crane Tech offers a wide variety of services from manufacturing, to sales and installation of overhead/jib cranes and hoists. We deliver prompt, efficient maintenance and repair services at competitive rates.

In addition, we complete a line of maintenance and repair services; as well as OSHA required certifications and load testing. Our established routine for load testing is a cost saver to us, which we gladly pass down to our customers. We do not carry certified load weights.

Instead, we select third parties for geographical purposes to keep time and cost to a minimum. These charges will be quoted to the customer up front, so there are absolutely no surprises.

Here at Crane Tech, we are the proud owners of the same products we service and sale. Around our house, we call them assets. Customer satisfaction is our highest goal, so please feel free to contact our office and we would be happy to provide you with any further information you may need.

We would appreciate the opportunity to do business with you!
