OUR SERVICES

Our team at Veramax Industries are highly skilled and licensed professionals who take removal and testing very seriously. We dedicate ourselves to the work of each project and accommodate for the safety of them and others around.

Our services include:

- ASBESTOS REMOVAL
- ASBESTOS TESTING
- METHAMPHETAMINE TESTING & DECONTAMINATION
- TELECOMMUNICATION INFRASTRUCTURE
- VACUUM EXCAVATION

ASBESTOS REMOVAL

We are a trusted asbestos removal company, working in major and rural regions across Queensland. Our team are fully licensed and have experience in commercial and residential properties, and removal of asbestos in civil construction for road developments/upgrades. Veramax Industries is registered with the Environmental Protection Agency & Waste Management of Queensland Government; our highly trained and skilled professionals can remove asbestos from your property in a safe manner.

MAKE SAFE'S

We are committed to ensuring our clients are safe at all times, we pride ourselves with a 24hour a day call out service to any property, commercial or residential to complete a make safe. A client's safety is our priority.

WASTE MANAGEMENT

If not disposed correctly, asbestos waste can cause serious environmental harm. Veramax Industries ensures a safe waste tracking and management system when transporting and disposing asbestos.

ASBESTOS TESTING

The only way people are aware of asbestos exposure at their property is by professional testing. Veramax Industries offers an asbestos testing service that allows you to determine whether asbestos is present in any suspected materials, such as fibre cement, corrugated fibre cement material and vinyl tiles. Veramax Industries provides a safe and secure testing procedure that will allow the client to feel confident their health is in good hands by our team.

METHAMPHETAMINE TESTING & DECONTAMINATION

A meth contaminated property has the potential of making the vacant occupants suffer health issues, it can also be very costly to decontaminate a property. Our speciality team have been trained in accordance with the Australian Government National Guidelines, to eradicate the toxins and decontaminate the property safely.

VACUUM EXCAVATION

Hydrovac excavation is a precise, non-mechanical, non-destructive process that uses pressurised water and an industrial strength vacuum to simultaneously excavate and evacuate soil. As the pressurised water breaks up the soil it creates a slurry that is removed by a powerful vacuum into a debris tank.

TELECOMMUNICATION INFRASTRUCTURE

We offer an extensive service that includes;

- Pipe Proving (Ensuring the existing conduit is suitable for infrastructure installation)
- Blockage Repair (Locating obstruction & repairing faults to accommodate hardware installation)
- Construction of Nodes (Active, electronic device that is attached to a network capable of receiving, transmitting information)
- Cable Hauling (Installation and recovery of cables, including multi-pair, coaxial, and optical fibre in access networks or customer premises in line with Telstra standards)
- Trenching (Lead-in trenching provides guidance to developers, consultants, builders & customer to locate NBN)
- Pitt & Pipe (Install telecommunication pits and conduits, including customer lead ins) Reinstatement of Concrete / Bitumen

WE ARE QUALIFIED

- REGISTERED ENVIRONMENTAL PROTECTION AGENCY APPROVED
- MEMBER OF DEMOLITION & ASBESTOS INDUSTRY ASSOCIATION QLD - (DAIA)
- ASBESTOS A CLASS SUPERVISOR
- ASBESTOS REMOVALIST
- FIRST AID + CPR
