

COLLABHUB

IGNITE INNOVATION. CONNECT
TEAMS. TRANSFORM OUTCOMES.

Welcome to CollabHub by Pinnacle Electric, LLC—the breakthrough collaboration hub engineered to power manufacturing excellence. CollabHub is an integrated solution that combines powerful collaboration technology with live manufacturing data, amplifying results and connecting your brightest minds in real time.

CollabHub empowers industrial organizations to break down barriers, ignite creativity, and drive operational excellence across every location.

Why CollabHub?

• UNLEASH INNOVATION ACROSS SITES

Say goodbye to silos and hello to seamless cross-plant teamwork. CollabHub instantly connects distributed teams for real-time problem-solving and knowledge sharing.

• PERFORMANCE AT A GLANCE

Share live operational intelligence and showcase plant performance in your meetings, bringing strategy and reality together.

• ACCELERATE BREAKTHROUGHS

Transform every room into a networked creativity accelerator: solutions spread faster, innovation cycles shrink, and best practices move organization-wide.

• MANUFACTURING-READY COLLABORATION

CollabHub is the only platform designed for manufacturing, built to handle your toughest collaboration and data integration challenges.

• NO ONGOING SUBSCRIPTION HEADACHES

Pay once for integrated technology and ongoing support, without costly recurring licensing.

"Wenger serves a global market and as we renovated our Technical Center in Sabetha, KS with the latest in extrusion processing technology it was equally important to enhance our digital capabilities to bring our Technical Center offerings to customers across the globe with state-of-the-art conferencing capabilities, live-stream connectivity, and professional quality reporting. It was important for Wenger to select a reputable partner for this investment and one that would be there to serve our growing needs for years to come. Pinnacle Electric was our partner of choice due to our previous experience with Pinnacle delivering high quality technology, professional installations, and expert service. As with previous investments we could not have been happier in selecting them again to provide our important investment in digital capabilities. The project execution was top notch but more importantly the ongoing service they provide is second to none."

Brian Streit
Senior Vice-President
Wenger

KEY FEATURES:

- Team Building Creation Centers
- Multi-Site Innovation Networks
- Daily Management Boards with Real-Time Data
- Integrated IT Collaboration Ecosystem
- Complete Construction and Tech Integration

THE PINNACLE ADVANTAGE:

- The only platform that merges top-tier conference systems with manufacturing intelligence.
