

Who We Are

Elevating Standards Since 1996

With more than three decades of proven expertise, Pinnacle Electric Inc. provides industrial-grade electrical and technology solutions that meet the highest standards of safety, quality, and reliability.

We partner with industrial and commercial clients to design, build, and maintain systems that power productivity and innovation.

Our licensed professionals combine technical precision with personalized service, ensuring every project is completed on time, on budget, and to specification.

What We Do

Comprehensive Electrical and Technology Services

Design-Build Projects – Complete electrical design and construction from concept to implementation.

Industrial Systems – Power distribution, control systems, and equipment installation for manufacturing and processing facilities.

Institutional Facilities – Safe and efficient electrical systems for medical, educational, and government spaces.

Lighting Solutions – Interior, exterior, and energy-efficient lighting design and installation.

Low-Voltage Systems – Data communications, audio-visual, security, and emergency notification setups.

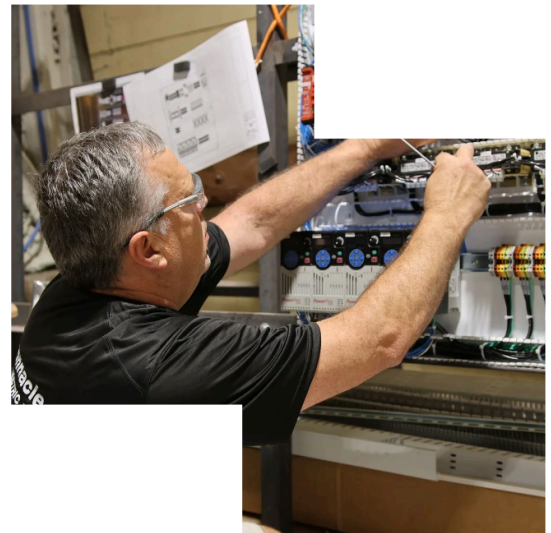

Technology Integration – Structured cabling, network infrastructure, and automation systems.

Our Customers Say

"Pinnacle Electric was our partner of choice due to our previous experience with Pinnacle delivering high-quality technology, professional installations, and expert service. As with previous investments, we could not have been happier in selecting them again to provide our important investment in digital capabilities. The project execution was top-notch, but more importantly, the ongoing service they provide is second to none."

Our Services

Pinnacle Electric provides comprehensive Electrical and Technology solutions built for industrial, commercial, and institutional environments.

Our services are engineered to meet demanding standards of performance, safety, and reliability, ensuring every project supports your operational success.

Electrical Services

Our licensed electricians deliver end-to-end electrical contracting, from system design to installation and maintenance.

POWER DISTRIBUTION SYSTEMS

Reliable infrastructure for plants, manufacturing, and facilities.

LIGHTING DESIGN & INSTALLATION

Interior, exterior, and energy-efficient lighting systems.

PREVENTIVE MAINTENANCE & UPGRADES

Keeping systems efficient and compliant.

CONTROL SYSTEMS & AUTOMATION

Complete electrical solutions customized to your facility needs.

Technology Services

Expanding beyond traditional electrical work, Pinnacle Electric provides technology solutions that enhance connectivity, safety, and efficiency.

COLLAB HUB

Fiber optics, data cabling, and server room setup.

DATA COMMUNICATIONS

Structured cabling installation, fiber optic services, cable management & organization, testing and certification, network hardware installation.

SECURITY SYSTEMS

Access control systems, video surveillance systems, intrusion detection systems, alarm & notification systems, environmental & safety monitoring, control room & monitoring centers.

EMERGENCY NOTIFICATION

Unified, reliable alert solutions for industrial and institutional environments.

COLLABORATION & COMMUNICATION

Seamless systems that support connected workplaces.

Why Choose Pinnacle Electric

- Over 30 years of proven expertise
- Licensed and certified industrial specialists
- Commitment to safety and customer satisfaction
- Integrated approach combining electrical and technology solutions
