

BE SMART

Who We Are

Experience & Trust

The SMART Group is a well trusted product and service provider in the sector. Established in 2009, our management team has a proven track record in manufacturing, distribution, retail and financial services, totalling 50+ years of experience.

Today, we are directly involved and responsible for delivering thousands of treatments per year, providing a unique understanding in the support that is required by today's professional operator.

SMART Ethos

Consumer Led NOT Manufacturer Driven

We are a democratic company and not a dictatorship. We endeavour to listen to and understand our partners. We identify and source the latest equipment, technology and ingredients that focus on consumers and their needs. This gives our clients the tools and skills to deliver leading treatments that achieve outstanding results and excellence in client care and satisfaction.

SMART Guarantee

We are so confident in providing you with the right product for your business, that if it does not deliver to the intention designed, we will buy it back!

SMART People

The SMART Group is a collaboration of dedicated and experienced professionals, all focused on delivering excellence to our clients. We are independent, free-thinking individuals working collectively to provide a vast array of knowledge, passion and skills.

100%

OF RESPONDENTS TRUST AND RECOMMEND SMART

THINK SMART

Intelligent

Our products are 'SMART' in their design, manufacture and applications, providing progressive and positive solutions. They hold the latest in intelligent design, technology and ingredients.

Unique

We understand consumer demands, enabling us to provide results-driven products, robust in both performance and commercial return with a point of difference to create market demand.

Innovation

We understand that change is constant and that long-term success is built from consistency to develop and stay ahead of the curve.

WORK SMART

Quality ASSURED products

All SMART products are made to the highest technical standards in both design and build. All devices are accompanied by the current regulatory certification for quality assurance and safety to ensure both client safety and treatment excellence.

Invest WITH CONFIDENCE

SMART Mapping

We understand that making the right investment choice can be a challenge. Our business development team can help you to map out your current business profile, assessing KPIs, treatment mix, marketing and demographics, combined with the assessment of current and future consumer trends.

We then use this information to identify the SMART products best suited to your current business profile, whilst meeting future demands and keeping you ahead of the competition.

SMARTJUVIUM

FRACTIONAL LASER RESURFACING

Skin regeneration, rejuvenation and collagen remodelling, with our nonablative, fractional erbium fiber laser.

The SMARTJuvium fractional erbium fiber laser achieves dramatic improvement in skin condition, structure and appearance.

Fractional Erbium Laser -How does it work?

The non-ablative fractional erbium laser produces 1000s of non-ablative Microscopic Thermal Zones (MTZ), affecting only 10% of the designated treatment area. The skin's structure is then stimulated and regenerates through rapid tissue repair.

The FDA approved technology produces significant improvement of acne scars, reverses sun damage, successfully removes superficial wrinkles, increases skin thickness, improves skin tone, texture and stimulates the production of collagen and hair follicles.

SMARTJuvium produces measurable results without the issues associated with agressive CO2 lasers and the non-ablative fractional delivery ensures no downtime.

FEATURES & BENEFITS

Skin rejuvenation & collagen remodelling

✓ Tone, tighten and brighten aged skin

Wrinkle removal

✓ Precision skin resurfacing

Scar Treatment

✓ Acne, surgical and burn

Vergeture repair

✓ Stretch marks, life and obesity lines

SMARTHydro-GEN

THE 360° APPROACH TO AMAZING SKIN

Hydrodermabrasion Is Just The Start

This multi-dimensional approach allows today's professionals to combine up to 8 technologies to treat almost all skincare problems. Individually, technologies can be utilised as stand-alone treatments catering to individual needs or combined and layered into a salon's existing treatment offerings - providing an array of treatment solutions.

AWAKEN, CLEANSE & HYDRATE

Hydrodermabrasion combines hydrogen molecules, AHAs & BHAs to exfoliate and deep cleanse the skin, whilst vitamin infused solutions deliver a hydrating and nourishing effect.

When the hydrogen-rich water meets the skin's oxygen, molecules are formed and extracted by radial tips, enhancing antioxidant levels and moisture, reducing inflammation. This leads to smoother, brighter skin with improved texture and tone.

KEY FEATURES & BENEFITS

Deep Cleansing

✓ Targeting skin congestion and blackheads, sebum levels, pore reduction, dead skin removal and vitamin infusion.

Skin Rejuvenation

✓ Skin hydration & moisturising, vitamin infusion, brightening, pre/anti-ageing and acne treatments.

Skin Tightening

✓ Including face & eye lifting, wrinkles & fine lines, collagen stimulation.

BEFORE AND AFTER TREATMENTS

REPAIRING

Scan to find out more

Why you should offer SMARTHydro-GEN!

Ultrasonic Vibration Skin Cleaning

Remove dead skin by high-frequency vibration waves, remove black-heads, soften skin keratinocytes and deeply cleanse the skin.

RF Hot and Cold Hammer

RF Hot stimulates deep skin collagen with heat; Cold mode cools epidermis, shrinks pores, and reduces redness. Functions used separately.

Ultrasound

Ultrasound increases transdermal absorption of SMART serums and stimulates collagen production in fibroblasts, offering a double benefit.

Hydrodermabrasion

Hydrodermabrasion combines hydrogen molecules, AHAs & BHAs to exfoliate and deep cleanse the skin, whist vitamin infused solutions deliver a hydrating and nourishing effect.

Bipolar RF

Radio frequency aids skin tightening and pre/anti-ageing by promoting collagen and elastin production. Ideal for mature and young skin.

Atomizing Spray Atomization turns vitamin serums into

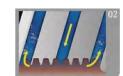

mist for better skin absorption. The oxygen-rich solution enhances cell metabolism and overall skin health, promoting serum ingredient activation.

HD Skin Analysis

High-definition camera captures before and after skin conditions from SMART Hydro-GEN treatment, enhancing client confidence and loyalty.

Think SMART. Be SMART. Work SMART | SMARTHydro-GEN

THE MARKET	FOR	Consumers of all types who seek to peel, exfoliate, cleanse, and hydrate their skin, and desire proven antiageing technologies to leave their skin healthy, refreshed, and rejuvenated.

SMARTSCULPTRO

INCORPORATING THE WORLD'S NO.1 FAT REDUCTION & BODY CONTOURING TECHNOLOGY

Reduce fat, tighten skin and improve cellulite.

Intelligent body shaping with a proven track record.

The SMARTSculpt Pro combines leading, clinically proven technologies to deliver comfortable and non-invasive treatments for circumference and fat reduction, skin tightening, total body contouring and the successful treatment of cellulite.

Combination of four proven technologies:

These work simultaneously to promote cell destruction, increase metabolic activity, boost collagen regeneration, stimulate fibre reconstruction and improve skin structure and texture.

FEATURES & BENEFITS

Intelligent and powerful bipolar RF

Gold standard 150w bipolar RF 40.68 MHZ RF achieves optimum temperature within seconds with deep penetration of 15mm into subcutaneous fatty tissue maximising apoptosis and the stimulation of deep collagen fibres

✓ Faster treatment times, efficient end point realisation & increased clinical results

Infrared heating technology

Fast heating of superficial skin for tightening and increased metabolic activity

✓ Enhances results and tightens skin

Adaptive roller massage

Increases blood and lymph circulation and accelerates the metabolism of unwanted fat cells

✓ Improved results, smoother and healthier skin

Vacuum suction technology

Adjustable negative pressure for all skin tones allows for skin to be targeted precisely

✓ Increased and better results

BEFORE & AFTER TREATMENTS

NEEDLE-FREE MESOTHERAPY FOR SKIN AND HAIR

Non-invasive, pain-free transdermal serum delivery

Get the results of mesotherapy without the pain or trauma

Capture the large market share of clients who want progressive long-term skin health without the need for needles.

Dual technologies – one result

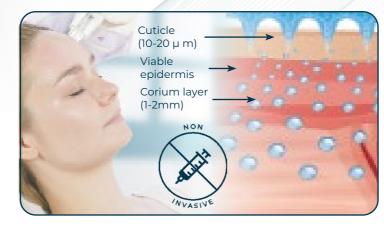

SMARTMeso uses two unique technologies, that combine to deliver products deep into the skin for efficient treatment results without the pain or trauma associated with traditional mesotherapy.

FEATURES & BENEFITS

Micro-tip transdermal technology

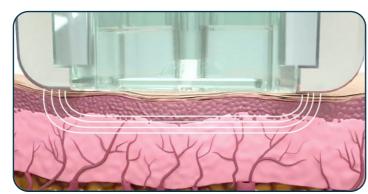

25 hollow Micro tips non-invasively penetrate the skin's surface to deposit the chosen product into the skin without trauma or pain.

Electroporation technology

Simultaneously, a micro-current changes the permeability of skin tissue by breaking the Cell Adhesion Molecules (CAMs). This creates a reversible lipid bilateral aqueous channel allowing product to be introduced and absorbed into the skin's dermis layer.

SMART PEOPLE

We understand your customers and we can help you grow your business and reputation.

By using the best-in-class technology combined with personalised support and attentive service towards our clients, The SMART Group are unique. As an independent aesthetic device company, we identify high-performing, versatile products from across the globe. Our products are highly clinically effective and consistently achieve high financial return, sidestepping the premiums that others may charge.

Since 2009, we have been helping the health, beauty and aesthetic sectors build their businesses, expand their customer base and grow their profits by supplying leading technology. Our management team have over 50 years combined industry experience which, with the support of a dedicated team of industry professionals, has helped us to develop the most innovative range of products.

Our Ethos

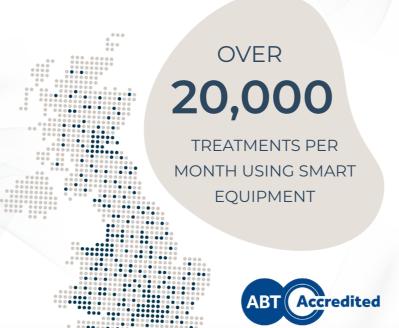

Consumer led, not manufacturer driven

SMART products are built with your customer at the forefront - delivering the treatments they need, in the best way possible. By identifying customer trends and sourcing the best technology, we can help you achieve exceptional treatment results, boost your business revenue and stand out from competition.

Our People

The SMART Group is a collaboration of dedicated, experienced professionals, all focused on delivering excellence to our clients by combining a vast array of knowledge, skills and passion.

We believe that a collective of independent and freethinking specialists, all working together, creates a strong and robust team in supporting today's professional operator.

Our Trainers

ran

Karla

arriet

Our Clients

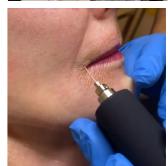

Our Training Package

We believe the best aesthetic beauty operators and clinicians are those who are not only given the technology to succeed but the training to go with it.

Our training packages are provided complimentary with every SMART product, giving you the clinical expertise, product knowledge and theory to deliver expert treatments and exceptional client care.

All SMART trainers are independent qualified educators, following a proven protocol and training plan, while not being harnessed by the "corporate" constraints that other suppliers may impose. They often have the added benefit of owning and commercially operating the device they provide training on, giving unique first-hand practical expertise and knowledge of your product in action.

Depending on the equipment, training is held onsite, at one of our dedicated training providers' or online. Upon completion, a manufacturer accredited & insurance approved certification is awarded.

ONGOING SUPPORT

Continual Personal Development

All SMART customers are supported through our exclusive Facebook user networks, developed to provide advice, mentoring, practical solutions, support and peer reviews to professional operators.

Through the sharing of ideas and clinical solutions, these networks provide a source of continued professional development and increase confidence in treatment delivery.

Licencing & Education Support

In areas where local licensing regulations may be required, The SMART Group are delighted to support our clients in meeting the requirements.

Working closely with professionals we can provide a full range of services, including national vocational qualifications, in beauty, laser and aesthetic treatments, laser protection advisors to enable compliance and comprehensive insurance providers.

Marketing and Business Support

We help our operators generate a positive and robust cash flow from day one, by providing them with all the tools and support they need to make their business excel.

This includes providing innovative marketing tools and assets and help setting up and providing bespoke online advertising campaigns to advertise your salon and your new treatment offerings or technology.

Tech Support

We offer a 48-hour 'Fix or Replace' warranty package on all equipment for up to 3 years, giving you peace of mind that if your SMART device encounters technical issues, our engineers are on hand to allow you to carry on business as usual.

Our HND qualified SMART engineers are qualified to work on the highest-grade electronic and clinical equipment, with full testing and diagnostic capabilities to ensure device servicing and repair is maintained to the highest standards.

For our SMARTDiode, diagnostics and software updates are delivered directly to the device through the unique Smart connectivity web-based function.
