

***Like 150R***

## **ENJOY THE ENVY OF THE CITY**

Live to ride with the perfect integration of retro, elegance and luxury, KYMCO Like 150 R is a stunning blend of the classic styling meets modern technology.

Not only does it look good, it outperforms its predecessor, the Like 200. With more power, highly refined frame and handling characteristics, lower center of gravity, lower total vehicle weight, improved braking systems and meets Euro 4 emission standards.

All this packaged into one neat scooter, the Like 150 R is sure to be the envy of the city.

## GALLERY

## FEATURES

### NEW ENGINE

The Like 150 R has KYMCO's completely new 150cc, 10KW 4-valve engine, making it the most powerful scooter in its class. The new 150cc engine provides a smooth and linear output throughout its power band.

### QUIET RIDE

KYMCO has developed several advanced engine mechanisms in the new model to reduce the operational noise for a more comfortable and quieter ride. High rigidity cam shaft holder minimizes the friction sound from valves – Better cam shaft-balance optimizes performance efficiency – Use of helical gear in the transmission reduces gear running sound – A bearing tensioner design reduces possible cranking noise at high rpm – Intake confined within resonance compartment reduces low frequency noise.

### LARGE UNDER-SEAT STORAGE

The under-seat storage compartment is large enough for most open-face helmets and accessories.

### SUSPENSION

Traditional telescopic fork at the front with a max travel of 95mm for extra comfort, at the rear a dual 3-stage shock absorber with pre load adjustment and a max travel of 86mm ensures a safe and superior ride, even with two up. Further enhancements have been made with high rigidity lightweight aluminium rims designed to improve the scooter's handling.

### BOSCH ANTI-LOCK BRAKING SYSTEM (ABS)

Bosch ABS is the most reliable and fastest acting emergency braking system on the market. The Like is equipped with Bosch's 9.1M ABS system, which is the lightest anti-lock braking system in the industry, at only 0.7kg.

## FEATURES (CONTINUED)

### BALANCE & COMFORT

The Like 150 R utilizes an exclusive S.S.C. horizontal engine support frame to help balance the weight transfer between the engine and the frame. It further prevents the lifting effect during acceleration and significantly improves the comfort the Like's ride.

The fuel tank of the KYMCO Like is positioned way down in the front for the scooter and under the floor to lower the center of gravity for better rider balance.

The Like is equipped with a front bi-beam frame design that increases the torsion resistance and provides further stability and comfort.

### LED LIGHTING

The KYMCO LIKE comes with a complete set of LED lights, adding a distinctive charm of modern design. The benefits are increased brightness and less energy consumption than your traditional bulbs. The front headlight beam has an extra wide coverage that ensures excellent visibility at night.

### SPACIOUS TOP CASE

Genuine accessory top case with colour coded hard lid included as standard provides deep storage for a helmet and other riding gear.

### CONNECTIVITY

The Like 150 R will be the second KYMCO scooter to feature Noodoe dashboard technology. It is an interactive dash that connects your smart phone to the scooter, provides smart navigation, has a customisable dash display, allows the rider to create their very own display and share through the Noodoe cloud – an online social community.

### LAMS APPROVED

Ride under the Learner Approved Motorcycle Scheme (LAMS).

### FACTORY WARRANTY

3-year factory warranty program\* provides advanced product coverage and delivers a superior ownership experience.

# SPECIFICATIONS

ENGINE		SUSPENSION		SIZE / WEIGHT	
Engine	SOHC, air-cooled, four-stroke, four valves	Front suspension	Telescopic fork	L x W x H	1935 mm x 690 mm x 1145 mm
