

Third-party Apps

Compliance third-party extensions and localizations within 3PL Dynamics.

Every day, logistics service providers around the globe use 3PL Dynamics to streamline their logistics processes. With every order and trip that is processed, customers enrich their database with a truckload of valuable data. Data that can be used to inform customers about the latest status and to further optimize its processes. Data which must be protected at all costs. That is why Boltrics does everything it can to keep the data of our customers and partners safe and protected from fraud and misuse.

To protect the data, Boltrics allows limited use of third-party apps in 3PL Dynamics. In this document, we state the apps that are supported and/or allowed by Boltrics.

Supported by Boltrics

To provide logistics service providers around the globe access to 3PL Dynamics and to guarantee its primary operation, Boltrics supports the necessary apps for this matter. In addition, our partners are allowed to install apps after they have been approved and developed by the partner. Yet, it is not allowed to install third-party apps if they are not listed in this document.

Note: It is not allowed to install third-party apps that do not meet the conditions described in this document, including but not limited to the provisions as stated in 'Allowed apps without management'. Does your organization decide to install third-party apps? Then this relieves Boltrics of the responsibility for the security of your 3PL Dynamics installation and its operational functioning.

Supported localizations:

- Localizations released by Microsoft
- All 3PL Dynamics modules and functionalities released by Boltrics
- Microsoft Application/Base Application/System application
- Localizations managed by partners for which no Microsoft localization exists in that country:

W1 – International version

Code	Name	Publisher
INT-LANG-PL	Polish Language for Poland	IT.integro sp. z o.o.
INT-LOC-PL	Polish Localization	IT.integro sp. z o.o.

CZ-LOC-CORE	Core Localization Pack for Czech	Microsoft

Allowed apps including activation (also after update)

- Jet reports connector

Allowed apps without management:

The apps below are allowed by but not managed by Boltrics. Therefore, these apps must be reinstalled after an update by you or your partner. In case of performance problems, you and/or your partner must demonstrate that the performance problems still arise without the use of the third-party app(s).

Note:

- A fee of € 500 is charged for requesting a new partner app.
- If support by Boltrics is necessary in the event of a malfunction caused by a specific installation, additional costs will be charged.
- Boltrics reserves the right to disallow the app.
- The app must not affect the standard.
- No dependency on the Boltrics solution may be present.
- The third-party app may not be used as a replacement for existing functionality available within the Boltrics suite.

Approved apps from partners:

W1 – International version

Code	Name	Publisher
IBSC-PLEXTENSION	PLExtension	ibsc.pl
