

SPEAKER LINE MONITORING

PART NUMBER	PRODUCT DESCRIPTION
S33500-00	NSC EOL2 End of Line Module <ul style="list-style-type: none">▪ Suitable for all NSC voice alarm systems▪ For monitoring speaker lines.▪ No return line required▪ Monitoring of 70V or 100V speaker lines▪ Contents: 1 piece  <ul style="list-style-type: none">▪ The EOL module can be configured as a 400Ω/25W @ 19kHz or 200Ω/50W @ 19kHz load.▪ Simple connection and installation▪ Low power consumption▪ Higher accuracy of impedance measurements▪ Monitoring down to the last speaker, even with low load on the speaker lines▪ No return wiring needed▪ Selectable load of 400Ω/25W or 200Ω/50W for the 19kHz pilot tone.▪ Due to its small size, the module is very easy to install at the last speaker in the line or at the end of a 70V/100V speaker line. The additional load at 19kHz keeps the power consumption very low.▪ For VA systems with A/B lines; use an End of Line module on each line.
