

WHY CHOOSE A WATER SOFTENER?

Hard water contains an excess of minerals such as calcium, magnesium and iron. This causes limescale deposits, which damages your bathroom surfaces, reduces the longevity of household appliances, costing you money on repairs, and reduces the effectiveness of soaps and detergents, forcing you to use them in excess. Add an extra star to your water to:

- **Protect your bathroom from limescale**
Your tiles, fittings and showerhead will be sparkling with less time spent on cleaning.
- **Protect household appliances** from limescale damage and decreased efficiency.
- **Save money and time** on household appliances repairs and replacements.
- **Be eco-friendly** reduce consumption of soaps and detergents by up to 50%.
- **Protect pipes, taps and showerheads** from clogging and reduction in water flow.
- **Look better** give your hair and skin their natural brightness and softness.
- **Make your laundry softer** even without fabric conditioner.
- **Enjoy better tasting tea, coffee and meals** with even more delicious flavours.

TECHNICAL SPECIFICATIONS

YOUR ECOWATER® EXPERT

Follow us on

Add an extra star to your water with a premium eVOLUTION™ water softener

Discover our long-lasting, sustainable and innovative products for water softening and filtration in an elegant, simple design for high-end customers.

WATER
EXPERTS
SINCE 1925

TRUST THE LEADING MANUFACTURER

EcoWater Systems® is worldwide leader in residential softeners industry. With over 40 patents, including the most economic operation algorithm, EcoWater® produces 25% of the world's softeners. EcoWater® is a member Marmon Group of Berkshire Hathaway, the company owned by Warren Buffet.

A COMPLETE SERVICE

EcoWater® directly manages every aspect: from design to production. The EcoWater® softeners are designed to meet your needs and EcoWater® Dealers take care of everything: from on-site inspection and installation to after-sales service.

THE BEST WATER SOFTENING TECHNOLOGY

eVOLUTION™ softeners are designed to fit the space and needs of diverse families. Compact, Boost and Power models are equipped with advanced algorithms for economic operation and enhanced valves to limit the pressure drop. High-end finish, durable materials and a simple elegant design will make you proud to have an EcoWater® product in your home.

SMART WATER TECHNOLOGY

With intelligent and patented EcoWater® technology, you will have the most economical solution available on the market, both in terms of salt efficiency and water consumption: up to 65% less operating costs per year compared to traditional softeners. Your investment will pay for itself in only a short while, leaving you to enjoy the comfort of fresh water all day, every day.

CONNECTIVITY

The Wi-Fi feature allows you to connect your eVOLUTION softener to your Wi-Fi network at home ensuring greater control and more convenient management via PC, tablet or smartphone. You can connect to your softener from anywhere via dedicated web platform.

SMS

E-MAIL

GET USEFUL INFORMATION

- Days remaining to refill salt
- Programmed regeneration cycles
- Average water consumption
- Remaining litres of softened water
- Maintenance reminder
- Salt level

You can also receive remote assistance if necessary and set personalised notifications, for example when the salt is running low or when annual maintenance is due.

(**) Connectivity depends on the compatibility of your Wi-Fi network. The softener cannot be connected to public Wi-Fi networks.

EcoWater Systems® advantages

- **Lowest salt consumption** in the market
- **Patented technology** for nearly 100 years
- **Reliable and innovative products**
- **High end products**, premium materials
- **95% of proprietary components** for maximum quality
- **Certified products** and **exclusive guarantees**
- **Site inspection, installation and service** managed by trusted EcoWater Dealers
- **Eco-Sustainable approach** in every way

eVOLUTION™

Intelligence

The softener is managed by intelligent software and automatically adopts optimal settings based on your actual water consumption.

Intuitive

The display provides information about remaining resin capacity, remaining salt, water consumption, operation of the softener and regeneration cycle.

Safety

The salt tank remains dry between regenerations, preventing the formation of salt bridges and limiting the risk of bacterial proliferation.

Convenient

The salt level is measured automatically with a real-time sensor. On opening the lid, a light illuminates the tank for easy filling. Quartz under the resin bed improves water flow (Boost and Power).

eVOLUTION™ DUO+

The DUO+ softener is the most flexible water softener from EcoWater®. Designed with two separate tanks the design allows the softener to fit where others can't, perfect for tight kitchens or utility rooms.

Stay connected and stay in control, with super efficient salt consumption (only 1 salt refill per month*) track your water use on the go, and live your life softened.

*Family of 3, 308ppm hardness.
