

ULTRA

WATER SOFTENER

HIGH PERFORMANCE
LARGE CAPACITY WATER SOFTENER

INFINITY

WATER SOFTENERS

TAKE ACTION AGAINST HARD WATER WITH THE INFINITY ULTRA

HARD WATER

SCALED BATHROOM

A clogged shower and marked screen.

SOFT WATER

SHINY BATHROOM

Free-flowing shower and shiny screen everyday.

HARD WATER

SCALED KITCHEN

A crusty kettle and scaled taps.

SOFT WATER

SHINY KITCHEN

Gleaming and limescale free forever

HARD WATER

SCALED APPLIANCES

Fed up with costly breakdowns?

SOFT WATER

EFFICIENT APPLIANCES

Free-flowing pipes and no more hidden limescale

HARD WATER

DRY HAIR & SKIN

Constantly moisturising and conditioning?

SOFT WATER

LOTS OF BUBBLES

You'll love your new spa bath!

WHY IS THE INFINITY ULTRA SO GOOD?

HIGH PERFORMANCE XP VALVE

Advanced non-electric valve, calibrated to your exact water hardness level delivers exceptional flow rates for UK plumbing systems.

SUPERIOR, HIGH-FLOW RESIN

High quality food-grade resin beads for greater capacity and flow rates.

LARGE CAPACITY, NON-ELECTRIC TWIN-TANK SYSTEM

Pioneering twin-tank system guarantees continuous soft water, even under the most demanding conditions.

NON-ELECTRIC

CONTINUOUS
SOFT WATER

LARGE CAPACITY
TWIN-TANK

From the manufacturer who pioneered the first twin-tank water softener.

HOW IS HARD WATER SOFTENED?

- The Infinity Ultra Water Softener has two tanks filled with tiny, food grade resin beads.
- As hard water, from your mains supply, passes through the resin beads, calcium and magnesium minerals stick to the resin beads. This turns the water 'soft' - a process called 'ion exchange'.
- Once the tank of resin beads is full of calcium and magnesium minerals it is cleaned with salt water which is then flushed down the drain.
- The resin beads are then rinsed with soft water to ensure there are no traces of salt.
- The water softener is now ready to continue softening the hard water.

WHY ARE TWO TANKS BETTER THAN ONE?

Electric, single-tank water softener

The water level needs to be lowered so the block is only slightly submerged. Most water softeners only have one tank connected to a computerised or mechanical timer.

The timer controls when the regeneration process should take place, usually at night.

Water softeners with two tanks are more efficient because they regenerate when needed - and not when the timer dictates. Installing a two tank water softener is the only way to guarantee a non-interrupted supply of soft water.

Non-electric, twin-tank water softener

SO HOW DOES THE INFINITY ULTRA WORK?

Tank A in stand-by, ready to be used.
Tank B is softening the water.

Tank A is softening the water.
Tank B is full of limescale minerals and is going through regeneration.

TECHNICAL SPECIFICATIONS

Dimensions		System	
Size (w x d x h)	480 x 395 x 657 mm + additional 35mm depth for overflow elbow	Operating Pressure	1.8/6 bar
Connections		Performance	
Inlet/Outlet	Custom	Min/Maximum Flow	1.1 / 45 L/min
		Regeneration	
Overflow	1" ID flexi hose	Time	11 minutes
Drain	1" OD flexi hose	Volume	22 litres
