

Required Photographs and Radiographs

Patient Photographs

- Teeth in occlusion
- Lips relaxed and in contact
- Natural head position with eyes looking forward
- Entire head and neck displayed
- Left eyelash slightly visible
- Approximate center of frame is 1.0 cm anterior to tragus
- White, or light, background

- Patient simply turns to face the camera
- Eyes are open and looking into camera
- Ears exposed
- No distracting eyewear or jewelry
- Inter-pupillary line horizontal to the frame
- Approximate center of frame is the tip of the nose

- Use the same format as the non-smiling frontal photograph adding a natural smile (social smile)

Intra-oral Photographs

- Occlusal plane should be horizontal and bisecting the photograph
- There should be equal display of the posterior dentition
- Teeth in occlusion
- Anteriorly-should display the entire ipsilateral maxillary central incisor at minimum
- Posteriorly-include the entire first molars at minimum
- All attached gingiva should be visible
- Occlusal plane should be parallel to the frame
- Use the same format for the right lateral intraoral photograph

Intra-oral Photographs

Mid-palatal raphe center
Frame the entire arch with minimal lateral soft tissue displayed

Fill the frame with the entire mandibular arch at least through the first molars
Labial surface of the central incisors parallel to the bottom of the frame
Midline centered in the frame

Right mirror photograph flipped horizontally to appear as a direct photograph of the right side
Extend view to second molars if possible

Left mirror photograph: same requirements as right-side occluded view

Panoramic

Panoramics are required for 7x7 cases, however it is heavily suggested for any case that you submit. The more information we receive, the better the clinical outcome for your patient.
