AUTOMATED INJECTION MONITORING

A flexible turn-key solution to continuously monitor underground injection pressures, streaming real-time data directly into the cloud.

CCR SECTION 1724.10.1 COMPLIANT
CalGEM APPROVED SOLUTION

EDGE-TO-CLOUD
SOLUTION

AUTOMATED INJECTION MONITORING

RECORD

well-specific injection pressures, including the highest instantaneous injection pressures each month

REPORT

necessary data to provide to CalGEM and automatically alert operators to ensure max pressure is not exceeded

RETAIN

injection pressure records, maintained by operators, as long as the well is approved and for three years thereafter

DATA AT YOUR FINGERTIPS

- ✓ Instantaneous pressures
- ✓ Daily, weekly, & monthly max pressures
- ✓ Configure pressure limits & alerts
- ✓ View event data & trends
- ✓ Solar status (if enabled)

FLEXIBLE DEPLOYMENT OPTIONS

PERMANENT SERVICE:
easily install and integrate with new or existing infrastructure

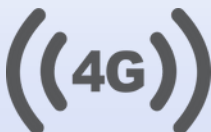

SELF SERVICE:
deploy a mobile unit as needed on your own

TYRION'S FULL SERVICE:
let us manage the install and deployment at your convenience

COMPLIANCE CONVENIENCE CONFIDENCE

Your underground injection operations are conveniently monitored by NUCLEUS in Tyrion's cloud-based platform, making it simple to manage pressure data and ensure compliance.
