

Motor Oil Shortage?

All my Industry sources indicate this is a real deal. Refinery damage in the Middle East is one culprit. Another is that we have not built a new refinery in our country in a very long time.

You already have the best extended service motor oil in your car right now. The oil we use lasts a year or 8,000 miles. Drive on with no worries.

We are motor oil experts.

StayCation?

Don't sulk at home over high gas prices. Take a road trip to the Weekend Lakeside Bar and Grill just a few miles north of Ashland..Google for directions. The burgers are great.

Get on Cornhusker Highway and follow it as it becomes the scenic Highway 6. Enjoy riding in your solid, quiet Honda or Toyota that we keep running like new. Dine outside by the lake.

Blinded by the Light!

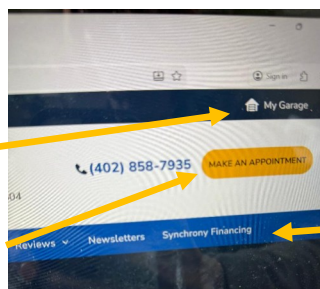

Revved up like a duece, another runner in the night.... Great song, but I digress.

Those super bright LED headlights can create real hazards when pointed right at you.

Stop pretending to be a deer. Quit staring at the lights. Look low and to the right. Focus on the road and keep your eyes low to the best of your ability.

What's the Deal with the 3-Day Week?

We manage our business by the minute. We reduced unproductive time. We don't interrupt our techs. We have parts ready before cars arrive.

In order to hire the best technicians, we ran an ad: **"We'll pay you for 5 days, you work for 3. What do you think?"** We have the best techs in the state.

We love our work. We pride ourselves on excellence. We are fresh and focused every day, but by Wed at noon, we are worn out.

Shop Management at Nascar Institute

I was honored to present a full day of Auto Repair Shop Management training at the Nascar Institute in Moorsville, SC

This was training for repair shop owners, employees and other Industry professionals. It was a sellout crowd.

Free Class—How to Buy a Car

Saturday morning, June 20, 9 to 10am .

You will learn how to select a car that you can love. You will learn how to find that car and how to negotiate the sale. Call, email or text to sign up.

How to Reduce Your Fuel Cost

No, it is not the revolutionary new invention on which the oil companies bought up the patents to keep it off the market. Don't be a sucker.

1. **Drive the speed limit** or below. I always drove 7 mph over. That's 77 to 82 depending on the state. Above 55, wind resistance increases fuel consumption by a lot. I pulled back to 65. My mileage went way up, blood pressure way down. I was no longer agitated by slow drivers. I am now the slow driver. I stayed in the right lane and cruised carefree down the road. Set your system so show your MPG.

2. **Tape an egg** to the bottom of your right foot. Accelerate slowly. Tromping down hard eats gas.

3. **Avoid using the brakes** as often as possible. Look far ahead for stop lights or traffic congestion. No reason to stay on the gas just to use the brakes.

What does this mean for you?

Your car will always be in the hands of experts.

You will never have to bring a car back because "we didn't have the parts for your appointment".

Really good shops run a week behind. **So we are no different than anyone else that asks that you book time a week ahead.**

WARNING—We have long prided ourselves on being the shop that leads the industry. There has been a delay in our order for robots to do our jobs. The initial prototype model left the building in search of Sarah Conner, whoever that is. For now, we are still using live humans. One downside is the excessive consumption of Twinkies. The expiration dates of all our specials can be extended to the end of the year if you just ask. Only one special per visit. No, if you go out the door and come right back in that doesn't count as a second visit.

Answers to Quiz

1. False. It might be approved by those selling it, but it's not approved by Honda or Toyota in cars 2014 or older. 2015 or newer you can use it.
2. True. Black streaks are degraded rubber. Time for new blades. This is a great test.
3. True. A clogged engine air filter kills engine power. Air is thin up high and it can really make your car sluggish. It won't affect fuel mileage, however.
4. False. It doesn't matter. I used a graduated glass tube, filled it and marked the level. The level didn't change after overnight in the freezer compared to later when baked in the sun.

The gas is heated by the sun on the transports and doesn't stay in the ground long enough to cool. I tested fuel temperatures at gas pumps, too.
5. True. Durango, Colorado has a thriving hummingbird population. I was out early one morning wearing "the shirt" and got buzzed loudly by a hummingbird who thought my red flowers were breakfast. Scared me to death. They are loud.

Save Time, Don't Be Late

We open at 6:30. Drive to our shop when there is no traffic. Pick up a loaner car. Let the Witt Team fawn over it for a spa day.

Return our loaner the next morning when there is no traffic on the roads. Get your car back refreshed and ready for more adventures.

Our service is good for a whole year or 8,000 miles. At only 6 cents a mile, it is a deal. So call us.
