

**CASTLEFIELDS CAR PARK CLOSED  
FROM FRIDAY 24TH OCTOBER**

Work on improving Castlefields Car Park is due to begin on Saturday 25<sup>th</sup> October. Members are therefore advised that the car park area will be closed from 5.30pm on Thursday evening until further notice. The lake will also be off limits to anglers this coming Saturday, but will remain open when works are not being carried out - updates will be issued.

The funding of this vital project was secured by the club through the Angling Trust's 'Fisheries Improvement Programme', which comes directly from the sales of rod licences. FIP was established to provide money to improve habitat and facilities - benefiting fish and anglers. It is jointly managed by the Angling Trust and the Environment Agency.

We appreciate that this is an inconvenience to members in the short-term, but these much-needed improvements will ensure those anglers permitted to park can enjoy their fishing over the wetter months.
