

RIVER MOLE & LAKES CLOSED FROM SUNSET ON JULY 9TH

In the interest of fish welfare, the club has taken the decision to close the River Mole and our lakes until further notice. Stammerham, which is managed by Newdigate Fisheries, will remain open.

With extremely high water temperatures and low oxygen levels, our precious fish stocks are incredibly vulnerable at this time. Click on this link for more: [Fishing during hot weather](#)

Please respect this ruling and do not fish until the club has notified you that our waters are open once more. Thank you for your cooperation.
