

**RIVER REOPENS TO MEMBERS
ON TUESDAY, SEPTEMBER 1ST**

We are pleased to welcome Dorking members back to the River Mole after a delayed and frustrating start to the season.

As you know, high temperatures and low river flows caused a dangerous drop in dissolved oxygen levels. To protect our vulnerable fish stocks, we took the vital decision to suspend fishing. The urgency of the situation was highlighted by the recent emergency fish rescue at Norbury Park.

Thankfully, the heatwave has passed and we hope you can now enjoy some well-deserved time back on the bank. We would ask all members to continue to practice strict fish care by minimising handling time out of the water.

The committee would like to thank you for your patience and understanding regarding the closure. Your support is key to protecting our river and its fish population.
