

Bedbug Prevention Preparation

Preparation Procedures

1. Remove things around baseboards (boxes, shoes, toys, clothes) 8 to 10 inches from baseboards in the entire unit, except kitchen and bathroom;
2. Remove all bed linens from mattresses;
3. Remove all other articles on mattresses and items surrounding the sleeping area, so mattresses and boxsprings can be lifted and inspected properly without damaging belongings;
4. Please make room so living room furniture such as sofas and chairs can be flipped and inspected properly;
5. All person and animals must remain out for 5 to 6 hours after the treatment. If there is a pregnancy, a child under the age of 2 or respiratory problem or allergic sensitivities, we recommend 24 hours.

Recommendation

Anyone who had a bedbug problem in the past should purchase a "Bedbug cover" to protect their mattress.
