

Cockroach Preparation (Maxforce)

Preparation Procedures

1. Empty cupboards, drawers and cabinets in the kitchen, vanity bathroom, medicine cabinet and move the fridge and stove to allow access to the back of all appliances.
2. Wash all kitchen cupboards before treatment.
3. Items (foods, objects, etc.) could be placed in the living room or on a dining room table.

After Treatment

- More activities is to be expected because Maxforce gel will attract all the insects, that are present, to go and feed for a period of 3 to 4 weeks after the application.
- If activities continues for more than 30 days please advise your management.
- Housekeeping is the first step for any kind of pest problem. Do not use strong detergents or any chemical after the application as it will affect the attractant inside the bait.
