

Cockroach Preparation (Residual)

Preparation Procedures

1. Empty cupboards, drawers and cabinets in the kitchen, vanity bathroom, medicine cabinet and move the fridge and stove to allow access to the rear of all appliances.
2. All food, dishes, and utensils need to be placed on the dining table and covered with a plastic sheet.
3. Remove all objects from the wall (shoes, toys, books, etc.) 8-10 inches from baseboards in the entire unit. Do not forget bottom of closets.
4. All cupboards should be washed as well as the side of the stove and fridge before the treatment.
5. **All occupants and animals must remain out for 4 to 6 hours after the treatment. If there is a pregnancy, a child under the age of 2 or respiratory problem or allergic sensitivities, we recommend 24 hours.**

After Treatment

- More activities are to be expected for a period of 3 to 4 weeks after the application.
- If activities continues for more than 30 days please advise your management.

Important

Make sure that no crumbs or leftovers are left on countertop or in the unit. Clean your microwave, oven and toaster regularly and also ensure that your dirty dishes are rinsed. The whole purpose is not to leave food for the cockroaches.

You cannot use products such as (Raid, Lysol, Windex, etc...) because you will be removing the poison. You must wait 2 weeks before cleaning with products.
