

Preparation Procedures for Food Insects

Preparation Procedures

1. Empty cupboards, drawers and cabinets in the kitchen and remove items from counter tops. The fridge and stove should be pulled out to allow access to the back of all appliances.
2. Wash all the interior of kitchen cupboards before treatment.
3. Place items (foods, objects, etc.) in the living room or on a dining room table. However, if the technician needs to make a crack and crevice treatment, the items should be covered with a plastic wrap.
4. Remove all objects from the wall (shoes, toys, books, etc.) to allow access to the baseboards.
5. **All occupants and animals must remain out for 4 to 6 hours after treatment. If there is a pregnancy, a child under the age of 2 or respiratory problem or allergic sensitivities, we recommend 24 hours.**

After Treatment

- More activities are to be expected for a period of 3 to 4 weeks after the application.
- If activities continues for more than 30 days please advise your management.
