

Pharaoh Ant Preparation

Preparation Procedures

1. All material must be removed from all cupboards, drawers and cabinets in the kitchen. Fridge and stove should be pulled out allowing access to the back of all appliances. All items must be removed from counter tops. All items could be placed in the living room or on a dining room table.
2. All items should be removed from the washroom vanity and medicine cabinet.

After Treatment

- More activities is to be expected for a period of 3 to 4 weeks after the application.
- If activities continues for more than 30 days please advise your management.
- House keeping is the first step for any kind of pest problem. Do not use strong detergent or chemical after the application. It will affect the attractant inside the bait.
