

## Silverfish Preparation

### Preparation Procedures

1. Empty cupboards, drawers and cabinets in the kitchen, vanity bathroom, medicine cabinet and move the fridge and stove to allow access to the rear of all appliances.
2. Items (foods, objects, etc.) in the living room or on a dining room table. However, if the technician needs to make a crack and crevice service, the items should be covered with a plastic wrap.
3. Remove all objects from the wall (shoes, toys, books, etc.) to allow access to the baseboards.
4. All occupants and animals must remain out for 4 to 6 hours after the treatment. If there is a pregnancy, a child under the age of 2 or respiratory problem or allergic sensitivities, we recommend 24 hours.

### After Treatment

- More activities are to be expected for a period of 3 to 4 weeks after the application.
- If activities continues for more than 30 days please advise your management.
