THE Internet may be wild, a paradox that for many years, according to a report.

Chlorophyllin (Chl) was prepared from chlorophyll *a* (Chl *a*) by removing the central magnesium atom. The resulting water-soluble Chl was used as the model for the chlorophyll *a* in the study.

There are many reasons why these individuals are not being interviewed, and the following are some of the most common:

Many managers are still in the position that they have previously held, and the same is true of the employees. The only change is that the employees are now more likely to be in the position of the manager.

AI ADOPTION IS A PEOPLE STRATEGY.

TRY THIS

Learn anything - chatgpt prompt:

“Explain [X] to me as to a 16, 20, and 25 year old, max in 100 words each.”

Superwords: “Step-by-step”, “actionable”, “Act as”, “Why”

Copilot start of the day prompt:

“Summarise my emails, teams messages and channel messages from the last workday. List action items in a dedicated column. Suggest follow-ups in a dedicated column. Table should look like this: Type (mail, teams, channel) | topic | summarisation | action item | follow-up. If I have been directly mentioned make the font of the topic bold.”

Tip1: You can add ‘all messages from [X] or on project [Y] need to be included’

Tip2: AI can make mistakes. Remember this is not instead of you reading your emails. This is meant as a support for you, so you can fast catch up on your work after the weekend or summer holidays.

TRY THIS

Try each of these prompts and notice difference in output quality

- 1 Provide 20 examples in form of bullet points + prompt for each on how a [X] professional can use ChatGPT in their day to day work.
- 2 Act as a genai specialist that has indepth understanding of Transport and Logistics. Provide 20 examples in form of bullet points + prompt for each on how a [X] professional in [company Y] could use ChatGPT to their advantage in their day to day work.
- 3 Act as a genai specialist that has indepth understanding of Transport and Logistics.. Provide 20 examples in form of bullet points + very specific prompt example (applying best prompt engineering practice) for each bullet point on how a [X] professional in [company Y] could use ChatGPT to their advantage in their day to day work.
