SCA STEELWORK
COMPLIANCE
AUSTRALIA

MISSION STATEMENT

Our mission is to provide our clients with the highest quality service and supply of structural steel. We deliver quality products on time and at a competitive price.

We are committed to developing the NT through sourcing employment, supply and subcontractors. We have an unwavering commitment to engaging and up skilling indigenous Australians. We purchase Australian made steel, supplies and consumables from local NT Companies. We pride ourselves in being “Territory Proud” and keeping local business and families in the NT.

Jakes Steel & Welding is now dual certified by SCA (Steelwork Compliance Australia) to meet the requirements of both AS/NZS5131 Structural Steelwork Fabrication and Erection and AS/NZS ISO3834.3. We are the first steel fabricator in the NT to achieve both the CC2 Accreditation and now the Dual Certification proving our commitment to quality workmanship and compliance in the steel fabrication industry is second to none.

Our capabilities range from large structural steel items through to detailed and design based architectural steel features from projects across infrastructure, mining and general construction sectors in Darwin and around the Top End.

Our services also include installation/Erection of our fabricated Structural Steel and Delivery to site with our Body truck or Prime Mover with extendable trailer.

OUR TRANSPORT

Our Transport services comprise of Prime Mover and trailers for all structural steel for onsite deliveries and Plant & Equipment to local and remote areas.

Our Tilt Tray service also caters for transport of structural steel and Plant & Equipment to site local and remote.

CAPABILITIES

STEEL FABRICATION

Jakes Steel & Welding's core business has always been Structural Steel Fabrication and our fully equipped workshop allows us to fabricate steel for multiple clients simultaneously, even while undertaking large fabrication projects.

We have established a team of young, dynamic Boiler Makers that are committed to ongoing training and where each member plays an integral part in our success.

All blasting and painting / galvanising are carried out by local companies that ensure standards are performed to exceed requirements.

Our quality systems cover the full fabrication process from receipt of drawings through to blast, paint / galvanising and final delivery, followed by completion of our QA documentation.

Our team is backed by modern and fully maintained plant and equipment and supported by management and administration based locally in our Darwin Office.

PERSONNEL

Our personnel have extensive industry experience and exposure, having worked on projects throughout the Top End including remote communities. Individually they have specific areas of expertise which, combined with a practical and flexible approach, allows Jakes Steel & Welding to successfully undertake a broad spectrum of activities within the industry.

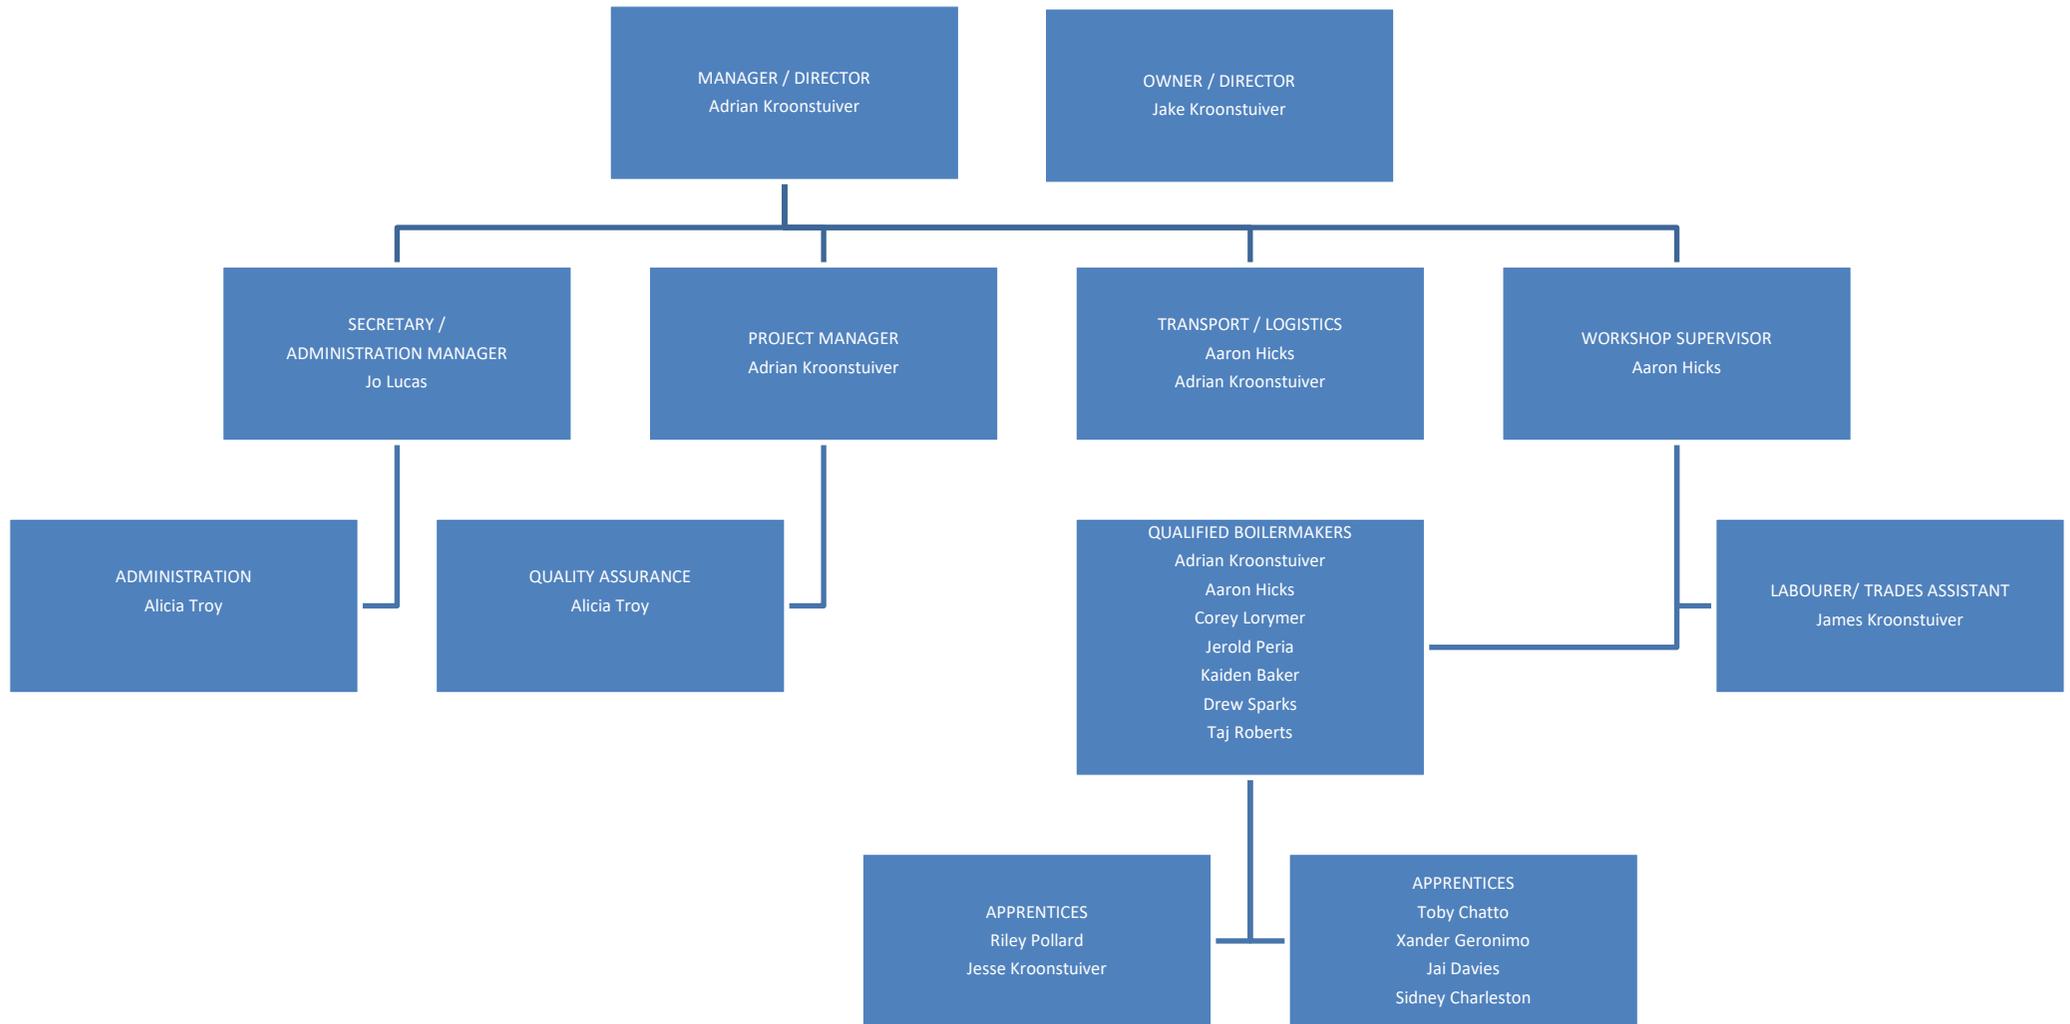

Jakes Steel & Welding Pty Ltd was established in 1981 and has remained a family owned and operated business since day one. Our qualified Boiler Makers have a combined experience of over 100 years.

OUR MANAGEMENT TEAM

Jake Kroonstuiwer	Director	50 Years' Experience
Adrian Kroonstuiwer	Managing Director	27 Years' Experience
Aaron Hicks	Workshop/Welding Supervisor	14 Years Experience
Jo Lucas	Administration Manager	27 Years Experience

OUR MANAGEMENT STRUCTURE

QUALITY ASSURANCE

WORKSHOP FABRICATION: QUALITY CONTROL

As demonstrated by achieving dual AS/NZS5131 CC2 and AS/NZSISO3834.3 Accreditation with SCA we ensure that all of our projects are completed to Australian Standards. During manufacture and fabrication for our projects, we have systems in place to manage our Quality Assurance from the start to the completion of each project. Upon request, comprehensive reports are collated and submitted to our clients at the completion of the project. Our reports document each step of the process with complete traceability and provide assurance to our clients that their completed product is of the highest quality standard.

Each component of fabrication, which will include the following test reports and documentation, will be supplied - upon request at time of award.

Inspection and Test Plans

Fabrication ITP's detailing our workshop processes and test will be included.

Tradesman Qualifications (Macro tests)

A third party certificate can be supplied showing our tradesmen are qualified to complete the fabrication to AS/NZS 1554.1

WPQR's and WP's

Our Welding Procedure Qualification records will be prepared by a qualified third party, these procedures will then be followed by Welding Procedure Specifications.

NDT Testing

Non – Destructive Testing will be performed and reported by a third party. All compliance reports will be supplied to our client.

Material Test Certificates / Heat numbers

Material test certificates for each order will be supplied showing heat numbers, batch numbers and certify that the material conforms to Australian Standards.

Blast & Paint / Galvanising

Conformance certificates / Micron Reading specifications will be reported and conform to Australian Standards.

WORK HEALTH & SAFETY

Jakes Steel & Welding are committed to ensuring a safe and healthy workplace by eliminating or minimising the risk of injury and damage to people, property, plant and equipment. We will achieve this by meeting and exceeding relevant workplace safety laws and embracing a risk management strategy which includes:

- Identifying hazards in the workplace
- Assessing risks to workers and others
- Deciding upon and implementing measures to control those hazards
- Monitoring that the controls are effective

Jakes Steel & Welding adopts the hierarchy of hazard controls plan to effectively manage all risks associated with the works completed.

We are committed to ensuring the provision of:

- A Safe work environment
- Suitable, safe and well maintained equipment, including PPE
- Information, instruction, training and supervision to ensure competence and safety
- Safe systems of work for our workers
- Safe use, storage and transportation of substance used in the workplace

Jakes Steel & Welding is committed to environmental awareness and preservation is reflected throughout our company. We conduct business in a manner that manages environmental issues responsibly. We fulfil this commitment by:

- Complying with environmental regulations
- Conduct operations in an environmentally sound manner
- Apply the principles or reduce, reuse and recycle in all processes
- Promoting environmental responsibility among our employees

Jakes Steel & Welding involve all employees in all levels of the company to help plan, develop and manage health and safety in the workplace. Workers have obligations under the Work Health and Safety Act 2011 and are expected to follow all company safety directives to create and maintain a safe and healthy workplace.

PAST PROJECTS

ALICE SPRINGS MULTI-STOREY CARPARK

Under contract to Sunbuild Pty Ltd, the Alice Springs Multi Storey Carpark was a supply, fabrication of structural steel, delivery to site and onsite installation/erection project.

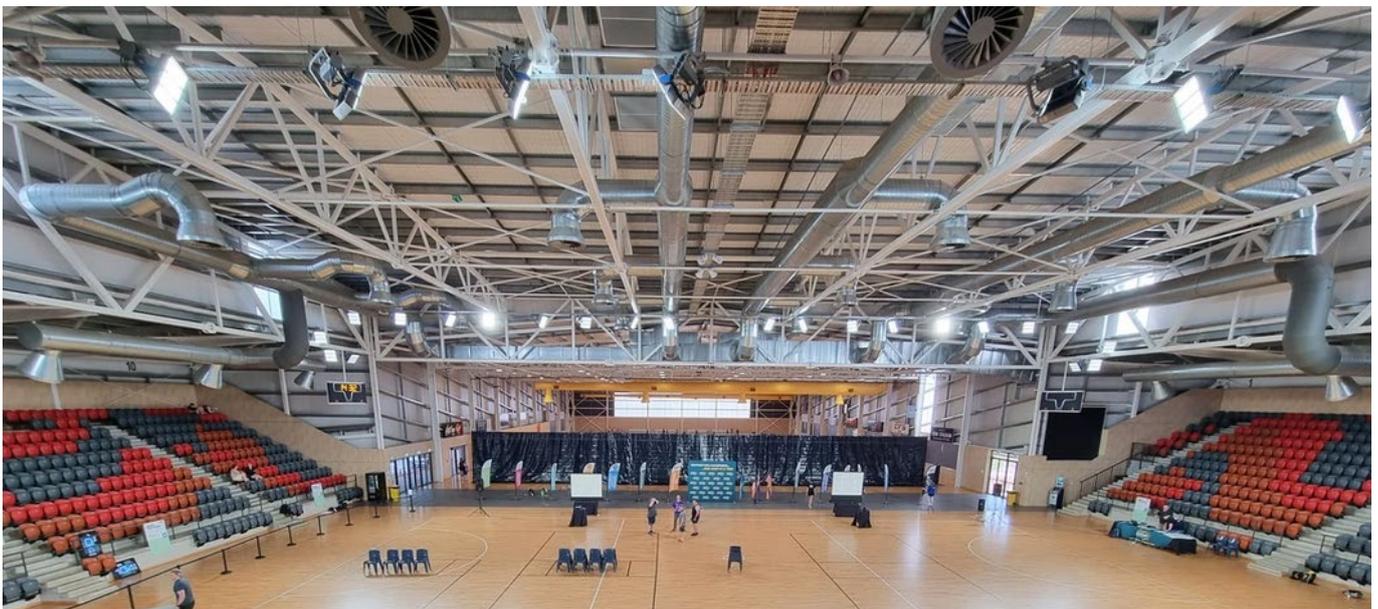

PAST PROJECTS

TERRITORY NETBALL STADIUM
