

Electrical Tape Wiring Class

We offer these classes on an on-demand basis both online and at the Miniatures and More store in Edmonds, Washington.

For either an online or in-store session, we will limit registrations to 4 per class (minimum class size is 2).

If you want to do an online class but do not have another one or two people who would like to do that same date/time, we can put that date out for others to join. Class times can be arranged with Connie Bigelow at 425-835-0541.

For online classes, registration and pre-payment will need to be arranged with 2 weeks' notice to send materials to attendees.

Tools for purchase through Miniatures and More

For online classes these can be purchased from the store when registering for class:

- Craft knife 2.50
- Scissors \$7.50
- Multi Grip glue: \$13
- Wire strippers 2 for @2.50
- Grandmother Stover's wallpaper mucilage (\$11.25)
- Brad Placement Tool: \$11

Not available from store: metal ruler, pliers, heat gun or other source of directed heat

2 HRS

\$100.00

In this step by step class you will learn how to:

- Tape wire a house or room box, including
- Where to place wires for both ceiling and wall lights.
- How to splice with both grommets and brads
- Where to place plugs and how to choose the best plugs for appearance
- How to choose the correct transformer for your project

Tools needed: Needle nose pliers, small scissors or snips (for wire), pencil and ruler, glue. Optional: Brad Placement Tool

Attendees will receive a corner box and the associated materials to complete their wiring project. If done in-store, all tools will be available; for online classes some of the tools can be purchased at the time of registration and included in materials box sent prior to class session.

Instructors

Erika Dean:

Works at Miniatures and More, has been showing her creative wares at arts venues for 20+ years. She excels at freehand sculpting, resin, and mushrooms.

Connie Bigelow:

Owns Miniatures and More, started doing miniatures with her daughter over 20 years ago. Able to end to end rebuild houses, or create custom ones..

Hasan Edain:

Has been honing skills in Laser and 3D Printing Cricut, and UV Resin for many years. Make custom models for 3D printing and laser. He has a background in computer science and Psychology.
