Execution & Compliance Platform for Food Safety & Operational Excellence

From Compliance Obligation to Operational Control

Traditional HACCP management relies on manual records and fragmented tools. It requires continuous human effort, offers limited traceability and delayed operational visibility, and struggles to adapt to evolving workflows.

As a result, organizations face high costs, increased compliance risk, and minimal real operational value.

DIGIHACCP:

DIGIHACCP transforms HACCP from static documentation into a **real-time execution and compliance control system**.

It operates as an **Execution & Compliance Layer**, connecting: **process design** → **daily execution** → **measurable performance**, across the entire operation.

Why DIGIHACCP

- ✓ Digital workflows and checklists (HACCP, SOPs, Quality)
- ✓ Guided execution by role, workstation, and process
- ✓ Real-time data capture at the point of operation
- ✓ Mandatory validations and structured inputs to ensure accuracy

Deployment Model (SaaS)

- ✓ Cloud-native platform hosted on Microsoft Azure
- ✓ Browser-based access (no installation required)
- ✓ Works on mobile, tablet, and PC
- ✓ No local data storage (GDPR-compliant)
- ✓ No dependency on internal IT resources
- ✓ Continuous upgrades with zero maintenance cost

DIGI ✓
HACCP
makes it easy!

OPERATIONAL EXECUTION

- ✓ Digital workflows and checklists (HACCP, SOPs, Quality)
- ✓ Guided execution by role, workstation, and process
- ✓ Real-time data capture at the point of operation
- ✓ Mandatory validations and structured inputs to ensure accuracy

PRODUCTION & TRACEABILITY

- ✓ Batch and lot tracking
- ✓ End-to-end product traceability
- ✓ Raw material to final product mapping
- ✓ Real-time production visibility

REAL-TIME MONITORING & REPORTING

- ✓ Live dashboards and KPIs
- ✓ Alerts and escalation flows for immediate response
- ✓ Instant report generation
- ✓ Historical data and compliance records, audit-ready by design

HACCP & COMPLIANCE MANAGEMENT

- ✓ Continuous monitoring of Critical Control Points (CCPs)
- ✓ Alerts and corrective action workflows
- ✓ Full compliance logs with complete audit trail
- ✓ Process versioning and controlled updates

QUALITY CONTROL

- ✓ Quality checks per process stage and batch
- ✓ Deviation and non-conformity tracking
- ✓ Root cause documentation
- ✓ Quality standardization across operations

ENTERPRISE INTEGRATION

DIGIHACCP works seamlessly alongside existing enterprise systems:

- ✓ ERP (e.g. SAP) remains the System of Record
- ✓ DIGIHACCP acts as the Execution Layer

- ✓ No system replacement.
No operational disruption.
Immediate value from day one.

ΟΦΕΛΗ ΑΠΟ ΤΗΝ ΧΡΗΣΗ ΤΟΥ DIGIHACCP

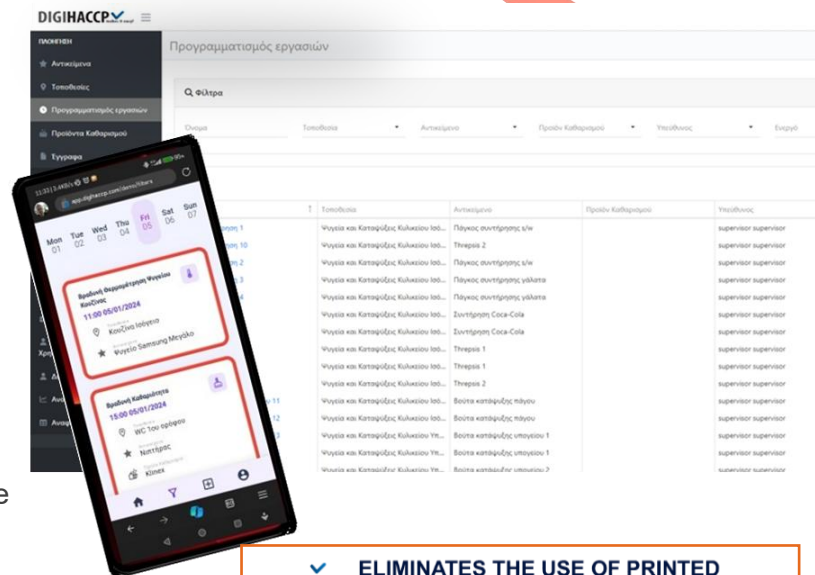

- ✓ ↓ 30–40% reduction in time spent on daily checks
- ✓ ↓ 40–60% reduction in audit preparation effort
- ✓ ↓ operational deviations and errors
- ✓ ↑ process consistency and control
- ✓ ↑ real-time operational visibility

DIGIHACCP IS NOT :

- ✓ a simple checklist tool
- ✓ a traditional HACCP system

It is an operational execution platform that ensures processes

are not only defined — **but consistently executed.**

- ✓ **ELIMINATES THE USE OF PRINTED FORMS**
- ✓ **ELECTRONIC INSPECTION AND DATA ENTRY FORMS ON MOBILE DEVICES, TABLETS, AND LAPTOPS**
