

About NOOL DeFi Ecosystem Token

Our Mission

To build the world's largest global platform and to provide financial freedom to all people worldwide.

Our Vision

To become the top cryptocurrency with the highest number of holders.

WHO WE ARE COMMUNITY

SUPPLY

NOOL has a maximum supply limit. Just like others Cryptocurrencys, NOOL operates within a token ecosystem, which means that as the number of users increases, the crypto's value rises.

IDEAS

As holders increase, the more the value of the assets users hold rise, and the more society is improved. The asset that is "making society better" is NOOL.

SOLUTIONS

With the more users purchase and hold their tokens, the more they can increase their assets and at the same time automatically contribute to our community-driven project.

DEFLATIONARY

NOOL is designed to maximize the user's profits the longer that the user holds their tokens. NOOL holders can earn tokens just for holding, no farming necessary. All transactions is trigger a 10% tax. 5% is locked into the liquidity pool, that rises the liquidity, 3% is shared out between all holders as a reward, 1% is burned and 1% to a Charity/Dev. project.

Deflationary NOOL

As shown in the above, a virtuous cycle is formed, providing a win-win for all holders, and the Community Project. This is what the NOOL is all about.

As this ecosystem expands, the more community-driven project will improve.

Our goal is to update the way the currently ineffective capitalist mechanism works by utilizing AI and the blockchain.

As soon as NOOL was deployed, 40% of the total supply, was burnt.

Why? So that a proportion of the yield from every qualifying transaction is also burnt, resulting in an ever decreasing supply, and an ever-rising price floor.

\$NOOL is the original NOOL DeFi Ecosystem token - this is where it all began, and the future of NOOL is bright. Check our plans for NFT collections, staking mechanisms, merch store integrations and much more.
