

# Capability Statement

## Company Data

Legal bus. Name	Bemr, LLC
Cage code	4XDD5
DUNS #	184820012
Physical Address	333 South Second Ave., Princeton, IN 47670
PO Box	610
Primary Gov. POC	Matt Robbins
NAICS Codes	332710, 332721, 326199, 333511, 333514
Number of Employees	20
Website	<a href="http://rpmtool.com">rpmtool.com</a>

## Who We Are

Since 2005, RPM Tool has expanded to over 35 advanced machines, specializing in precision machining of metal and plastic components. With a 40,000-square-foot facility and a dedicated team of 20 professionals, we guarantee that your components are crafted to exact specifications. Whether it's milling, turning, drilling, or grinding, we deliver consistent, high-quality results you can rely on.

### Waterjet Cutting Machine

### Flow M100-4020

Waterjet machines cut complex shapes in a wide range of materials, including metals, composites, and non-metals with high precision and minimal heat.

### Milling

**Machines:**  
**Hurco VMX 30**  
**VMX 42i**  
**VMX 50i**  
**VMX 50**  
**VMX 42i**  
**2-CNC knee mills**  
**2-CNC bed mills**  
**DMC DT 40i Tapping Center**  
**several manual mills**  
 Our machinists utilize these advanced machines to drill, contour, and execute multi-axis operations, ensuring precision and accuracy in every component they create.

### Turning

**Machines:**  
**Star SB-20R type G (Swiss Lathe)**  
*The Swiss Lathe is a high-precision machine specifically designed to produce small intricate parts at larger volumes.*  
**Hurco TMM8**  
**Mazak Quick Turn Smart 300**  
 These special lathe machines allow for heavy duty machining of difficult materials and they have a long Y-axis stroke to ensure precise machining of complex components.

### EDM Services

**Machines:**  
**Sodick SLN 600G**  
**Form 20 EDM**  
**HD 8 Hole Popper**  
**2-Joemars JM322c + zF50C**  
 Wire EDM machines are the go-to choice for precision manufacturing, delivering intricate shapes and complex geometries with unmatched accuracy. Whether crafting fine details or achieving tight tolerances, EDM technology ensures superior results. Additionally, the Hole Popper EDM machines revolutionize drilling efficiency, enabling rapid creation of various hole types—including blind holes and those on inclined surfaces—with precision and speed.

### Grinding

Equipped with an **Okamoto ACC16-32GX** and over 10 additional grinders, we expertly handle a diverse range of materials, ensuring high-precision results and exceptionally smooth surfaces.

### Past Performance

With a customer base of over 100 companies, we manufacture precision components for industry leaders such as Reading Bakery Systems, Pacific Press and Shear, Toyota, TE Connectivity, Anchor Industries, and many more.
