

FROM REACTIVE TO PROACTIVE MAINTENANCE

Tired of unexpected HVAC equipment issues? Stay ahead with real-time monitoring and clear maintenance records. We set up daily logs and 24/7 remote sensing to track pressure, temperature, and flow—catching problems before they happen. Plus, our custom Maintenance Activity Reports give you instant electronic access to all service history. **More control. Less downtime. Peak performance for your chillers, cooling towers, and HVAC systems.**

1

PREVENTIVE MAINTENANCE

- System analysis
- Operational checks
- Detailed inspection
- Cleaning
- Filter replacements
- Lubrication
- Performance testing

Preventive Maintenance (PM)
Uses a scheduled approach to reduce failures and extend equipment life.

2

PREDICTIVE MAINTENANCE

- Voltage checks
- Thermal imaging analysis
- Motion Amplification
- Vibration analysis
- Alignment tests
- Fluids analysis
- Non-destructive tests

Predictive Maintenance (PdM)
Uses a data-driven approach to predict equipment failures.

ADVANTAGES OF WORKING WITH US?

- 25+ years industry experience
- Fast, responsive service
- Regulatory compliance experts
- Full-service maintenance and overhaul
