

DD-2X3-3/4HP-1P

The IAP 2X3 DownDraft Table is a compact, plug & play unit. Boasting 250 FPM of capture velocity, this table helps ensure smoke, fumes, and dust are captured at the source and that your employees/students stay safe! Great for high school, trade school or light manufacturing applications.

Key Features Explained

- **Side & Back Walls:**

These help keep smoke and dust contained to the table for better capture. They also keep grinding sparks from flying over the room. If working on larger pieces, the walls can hinge open.

- **Pulse Cleaning:**

The cartridge filter is self-cleaning at the push of a button with compressed air and effectively removes dust at 99.97% efficiency. This extends the life of the filter. 90 PSI is required.

- **Spark Arrestor:**

This feature helps knock down any large sparks from making their way into the filtration side of the unit.

Product Specifications

- Side & Back Walls
- Timer Activated Pulse
- Pulse Cleaning System
- 12/14 Gauge Steel Construction
- Powder-Coated IAP Black
- Built-In Spark Arrestor
- NFFR Cartridge Filter

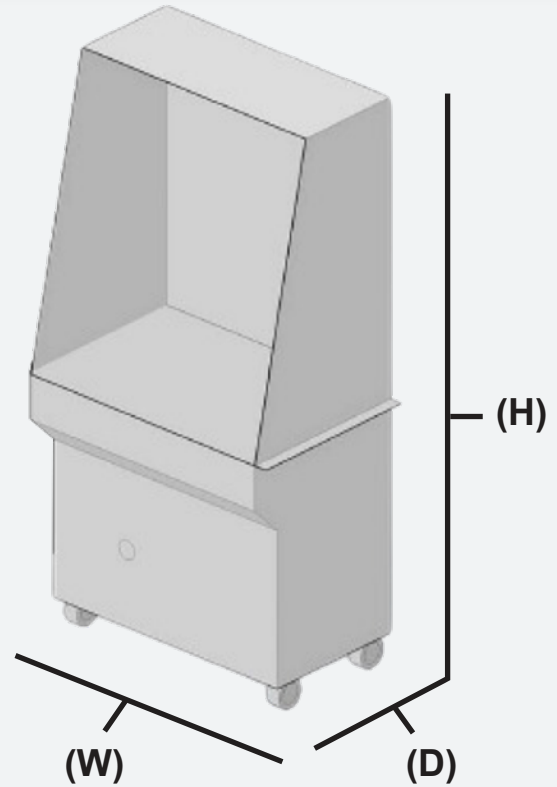

Triple Protection Spark Arrestor

For applications that involve sparks, we have pre-engineered 3 levels of spark protection. The first layer is a built-in drop out tray for heavy slag. The 2nd layer is a wrap around all but the bottom 20% of the cartridge. The 3rd layer is the cartridge filter that is treated with a fire retardant coating.
