Health &  
Welfare

	Aminox	Amino Acids, Vitamin B-complex, Zinc, Sodium, Potassium	<ul style="list-style-type: none"> <li>in case of intestinal disorders</li> <li>to maintain the electrolyte balance</li> <li>in period of stress, to restore the body's vitamins and amino acids</li> </ul>
	B Complex	Vitamin B-complex, Vitamin K3, Niacin	<ul style="list-style-type: none"> <li>in case of disordered metabolism</li> <li>after medical treatments</li> </ul>
	Strong	Carnitine, Betaine, Magnesium, Calcium	<ul style="list-style-type: none"> <li>for enhancing the energy metabolism</li> <li>improving the immune response</li> <li>to strengthen the liver metabolism</li> <li>supporting osmoregulation</li> </ul>
	Selenex	Vitamin E + Selenium	<ul style="list-style-type: none"> <li>for prevention of oxidative stress</li> <li>supporting muscle metabolism</li> <li>for enhanced fertility</li> </ul>
	ADEC	Vitamin A, D3, E and C	<ul style="list-style-type: none"> <li>for promoting resistance against diseases</li> <li>protection of skin and mucosa</li> <li>regulation of mineral metabolism</li> </ul>
	Ca Balance	Calcium, Vitamin D3, E and C, Sorbitol	<ul style="list-style-type: none"> <li>for improved bone metabolism and function of skeleton</li> <li>improving egg shell quality</li> </ul>
	Mineral	Citric Acid, Glycine, Calcium, Sodium, Potassium, Magnesium, Iron, Manganese, Zinc, Iodine, Cobalt and Copper	<ul style="list-style-type: none"> <li>to overcome stressfull condition (eg. heat)</li> <li>for stimulating water and feed intake</li> <li>to restore the mineral balance</li> </ul>
	Livo	L-Carnitine, Choline, Betaine, Vitamin B1, B6 and K3, Potassium and Zinc	<ul style="list-style-type: none"> <li>for supporting fat metabolism</li> <li>to protect liver functions after medications and convalescence</li> </ul>
	Livo Max	L-Carnitine, Choline, Betaine, Vitamin B1 and B12, Niacin, Ca Pantothenate, Sorbitol, Inositol, Artichoke Extract	<ul style="list-style-type: none"> <li>protection against fatty liver syndrome, hepatitis and metabolic disorders</li> <li>to optimize the energy metabolism</li> <li>for improved utilization of fatty acids</li> </ul>
	Detox	Acids mix, Potassium Citrate, Sodium Formate, Copper	<ul style="list-style-type: none"> <li>for preventing liver damage from mycotoxins and endotoxins</li> <li>to stimulate feed intake</li> <li>for prevention of intestinal disorders</li> </ul>
	No Stress	Magnesium, Calcium, Sodium, Tryptophan, Vitamin E and B12	<ul style="list-style-type: none"> <li>to calm animals and avoid cannibalism</li> <li>for reducing stress during transport</li> <li>as support for the metabolism</li> </ul>
	Deep Breath	Essential oils (Mint and Thymus)	<ul style="list-style-type: none"> <li>to support therapy of respiratory tract and pulmonary disease</li> <li>In periods of stress</li> </ul>
	Probios	<i>E. faecium</i> , GOS, Vitamin D3 and C	<ul style="list-style-type: none"> <li>to improve gut microflora</li> <li>natural defense against intestinal disorders</li> <li>to restore health after medical treatment</li> </ul>
	Spices	Essential oils (Oregano, Thymus, Cinnamon)	<ul style="list-style-type: none"> <li>for protection of the GUT health</li> <li>to improve digestion and performance</li> <li>antioxidant effect</li> </ul>

We offer **flexibility** in pack size from 1 to 1.000 litres as well as custom made formulations on request.  
In addition we can offer a full range of water soluble **powder** formulations.

# MYVIT

*Nutritional Supplements for  
Application via Drinking Water*

Although our modern livestock animals are usually well supplied with vitamins and nutrients, there are situations when an addition via the drinking water is indicated for a short period of time.

#### **MYVIT – Nutrient supplementation via Drinking Water**

Vitamins, minerals and amino acids are organic substances which are indispensable to the normal metabolic process of the animal's organism. Common feedstuffs contain only limited amounts of them. These substances are essential to maintain health and performance (growth & fertility).

In general, the animal organism itself is not able to synthesize vitamins as required and a low supply can lead easily to deficiency symptoms. Therefore a supplementation is very important in periods of *insufficient nutrient uptake via normal feed* or during phases of an *increased nutrient requirement*.

**The need for additional nutrients often coincides with**

**Periods where there is an insufficient solid nutrients uptake via feed**

In very young animals as well as in periods of stress (heat, housing, transport, feed change, diseases) or due to digestive disorders.

**Increase of nutritional requirements**

In periods of fast growth, in case of subclinical disease, after medical treatments or concurrently with vaccinations.

**Advantages of Supplementation via the Drinking Water**

**Easy to use**

The application of MYVIT products is simple and fast and it is targeted to compensate any nutritional deficiencies that may take the animals to a stress condition.

**Targeted application**

In periods of stress the water intake remains constant for a longer time than the feed intake that reduces rapidly. in this way the nutrients are given to the animals just when there is a real need.

**Effective start-up**

In the first days of life, animals start to drink before eating solid feed. So the nutrients are provided in the most safe and efficient way.

#### **FEATURES OF MYVIT RANGE:**

- *Optimized formulations for poultry*
- *Constantly tested and improved with the help of veterinarians*
- *Easy to use and handle – up to 2ml per 1 litre of drinking water*
- *Ready to use: the products dissolve completely and perfectly in drinking water systems*
- *Shipment all over the world*

#### **Packaging**

1litre bottle, 5 litres tank, IBC.
