

The Stitchin' Rag

Machine Store Buzz 4th Quarter 2026

By Jeff

We have just returned from the Bernina and the Baby Lock annual conventions. This is where we see the new products and receive training on them. There can be over 500 dealers at these conventions so it's a great opportunity to network with other dealers to see what is working for them and share stories. At Bernina University we received an award for our "20th" year as a Bernina dealer, time flies. The outstanding new products from Bernina are the wide walking foot #50W that will now accommodate a 9mm stitch width and the B790 Ultra sewing machine. This new model has top of the line features for sewing and quilting in the hoop and a great incentive bundle

if you order before the end of the year. Baby Lock is introducing two new 10" wide sewing space machines, one embroidery only and the other a combo. The new Luna combo model has a laser light for sewing and fantastic embroidery features including an 8" by 14" hoop size. Also a new serger by Baby Lock called the Serenity, which has a new exclusive needle exchange system that needs no tools, the needles just clamp in with a simple push, this will be the wave of the future for needle changing.

Hi Fashion's Quilters Quarter Inch...

By Trista

2026, thank you for all the opportunities and lessons learned. Life is about growth, right? As we work our way through it all, we learn as we go. One of my favorite takeaways from tech this year was from a speaker who talked about Joyosity; the idea that joy can be part of all we do, even the hard things.

Every once in a while, I get the chance to sew while I'm at work. Keep in mind... I am working! I'm often preparing for a class with customers coming and going. Sometimes that makes it a wonderful experience; other times, it's really hard to focus, slow down, and make sure I'm doing things

correctly. And then there's the added challenge of remembering all the little details I need to share with those taking the class. Oh my. 😊

But there's something special about those moments. They remind me that joy really can show up in the middle of the busy, messy, challenging parts of life. Maybe that's one of the biggest lessons I'm taking with me from 2026: keep learning, keep growing, and don't forget to find a little JOY along the way. CHEERS! Happy Sewing.

TECH CORNER

By Jeff Vogel

Jeff "hates" canned air and prewound bobbins. Here is why; prewound bobbins do hold a little more thread but they are wound so tight that the thread sometimes will not even come off, or the bobbin will split in half. Also, the bobbin is so cheap that it does not fit properly and the stitch quality is very poor. I know some of you have great luck with them and more power to you for finding some that work, but in my experiences most pre-wound bobbins are not worth it. Now for canned air: "DON'T USE IT" unless you have been trained by a tech on how to use it. The can contains moisture that can cause rust and it blows all that lint and debris into the deep part of your machine which has a light coat of oil on the parts, then the lint just attaches to that and dries out the oil. We have seen gears so full of lint that the teeth are packed and the gear set has to be replaced at a high cost. We recommend using a mini vacuum or attachments on

your home vacuum. We carry a tested Sonic Mini Vac that has good suction and size to get in to the areas that need cleaning. Also a simple pipe cleaner will clear out thread path areas to prevent tension issues. The tech department has just passed 24,000 documented repairs, many more on the spot fixes, Jeff has been around since number one, he oversees the training and quality, if it is not right we redo it and it goes to front of the line.

Crazy Quilt

CRZ

I had a great time sewing these together, quick and easy, very forgiving as far as quilting goes and you know I need that grace. Finished size will vary, good table topper size or even a mug mat if you'd like. I used machine decorative stitches, there are so many beautiful ones to choose from. 2 block types shown here, there are more ways to explore in class.
