From the foundations
to the rooftops of
our cities,
our steel supports
& strengthens
our nation.

ABOUT US

NJR Steel has grown from a single operation in the 1980's to a group of companies that now manufacture and distribute steel products and value added services, to our network of 26 operational businesses located countrywide.

The NJR Steel Processing business manufactures Reinforcing Bar as well as cut and bend of reinforcing bar, Reinforcing Mesh, Indented drawn wire and straightening, Flat Products, Palisade Fencing Products, Thin gauge flat bar, Roofing Products and offer coil processing, cut to length and slitting services.

NJR Steel – Exports Division supplies the full range of steel and related hardware products to customers in Africa.

Our retail shops located in each branch stock a wide range of steel related hardware, including paint, welding products and abrasives. Procurement and distribution of all steel products is managed by NJR Steel - Central Buying, which operates from a 20 000 square meter warehouse in Labore, Brakpan, Gauteng.

NJR Steel's geographic footprint and extensive product offering continues to give it a strategic advantage, as it enables us to provide products and value added solutions to our customers.

"NJR Steel's geographic footprint
and extensive product offering
continues to give it a
strategic advantage."

WHAT MAKES US **FIRST FOR STEEL**

Passionate people

Culture of discipline

Attention to detail

Independent, profitable
businesses

SERVICES

- Wholesale & Retail
- Coil Processing
- Delivery
- Exports
- Fencing Solutions & Installations
- Palisade Fencing
- Wire Fencing Products
- Procurement Services
- Reinforcing Steel Cut & Bend
- Reinforced Mesh
- Steel Cut to Length

All our NJR Steel branches offer a wholesale and retail steel service, and our retail shops are fully stocked with steel and related paint and hardware products, providing our customers with a fast and friendly shopping experience.

Besides steel, products sold in these one-stop-shops include welding supplies, cutting and grinding discs, sliding gate wheel kits, fasteners, sliding door systems, paint, security gate locks, decorative mild steel and ornamental castings, and every other hardware product needed when working with steel.

Whether you are an owner builder, building contractor, or planning a DIY experience, we believe that no project is too big or too small for NJR Steel.

WHOLESALE
& RETAIL

COIL PROCESSING

Direct access to our in-house De-Coiler allows us to buy directly from the mills and offer our customers a “de-coiled to size” service, reducing wastage and improving our customer margins..

Our de-coiling and cut-to-length facilities produce thicknesses of 0,5 – 12mm and widths of 925-2000mm from hot-rolled, cold-rolled and galvanised material. Slitting facilities are available to cut from 0.5 – 3.0mm thicknesses with input width up to 1500mm and can slit from 30mm width and up. Plasma cutting facilities for up to 60mm thick steel plate are also available. Our reduced lead times and timely delivery services differentiate NJR Steel from competitors who have to rely on third-party contractors.

DELIVERY

We offer a friendly and efficient delivery service. Our 'hands on' approach allows us to fine-tune vehicle utilisation on a daily basis. With our fleet of over 200 vehicles (with a payload capacity ranging from 1 to 28 tons), we are able to deliver over 1000 tons per day.

Most branches offer a free delivery service within a 50km radius, and will even deliver to your home. Deliveries are accurate and timely as they are overseen by management and coordinated with input from all interested parties.

EXPORTS

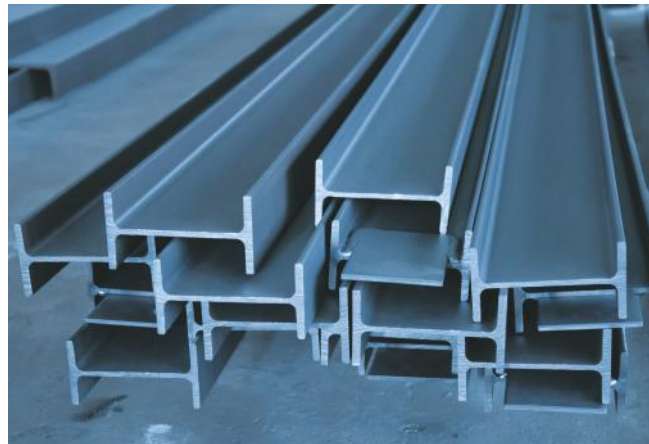

NJR Steel-Exports (Pty) Ltd consists of a dynamic team of individuals who supply the Sub-Saharan African market and local trading houses with a wide variety of steel products.

NJR Steel-Exports offer a turnkey procurement service and excel at consolidating any type of orders which are sold and distributed to our diverse customer base on the African continent and even beyond.

Strategically based at our main distribution warehouse in Brakpan, NJR Steel-Exports have easy access to the entire NJR Steel range of products as well as access to products manufactured on the same site by NJR Steel Processing and NJR Steel-Fencing. This allows for quick and easy loading of mixed loads onto transporter vehicles

Proudly supplying
steel to Africa through
our exports division

The De-Fence® range of fencing products now offer the market a complete solution when specifying or selecting security fencing products and services specifically designed to meet all levels of security required.

FENCING SOLUTIONS & INSTALLATIONS

CLEAR VIEW FENCING

NJR Steel branches stock the full range of De-Fence[®] fencing products, and offer these directly to the D-I-Y customer and the fencing Contractor. These include the De-Fence[®] MAX, De-Fence[®] MULTI, De-Fence[®] MID, De-Fence[®] POOL, De-Fence[®] ECONO, and a wide range of customised gates and fencing accessories to suit your security requirements and budget. We also offer our customers installation and on-site visits for quotation purposes.

PALISADE FENCING

NJR Steel manufactures and stock a broad range of palisade fencing products which are supplied to fencing contractors, installers and DIY markets. Palisade fencing is a tried and trusted solution for residential, commercial, municipal and industrial perimeter security. Palisade fencing can be powder coated, galvanised or painted to ensure rust resistance and added longevity.

NJR Steel stocks complete palisade panels and loose components in a variety of spike designs including 3-spike, 5-spike, 7-spike and Devil's Fork, as well as several options of pale profiles and designs.

WIRE FENCING PRODUCTS

- Plain Galvanised Wire - Straining & Binding
- Steel Wire
- Barbed Wire
- Diamond Mesh
- Welded Mesh
- Field Fence
- Razor Wire
- Razor Mesh
- Fencing Posts, Stays & Gates
- Fencing Standards & Droppers

PROCUREMENT SERVICES

NJR Steel sources directly from all local primary steel producers and international suppliers, enabling us to source non-stock items for customers at competitive prices.

Proudly supplying steel to the following industries:

Agriculture | Civils | Construction | Engineering | Fabrication | Manufacturing | Mining | Security | Signage
Truck & Trailer | Hardware & Building Merchants | Exports

REINFORCING STEEL CUT & BEND

NJR Steel offers cutting and bending of reinforcing steel to customer specifications. Reinforcing steel is an integral part of any construction project involving concrete. We offer this service to our clients on an individual and large scale basis and our expertise, professional attitude and attention to detail allows us to be involved from the “foundation phase”.

Reinforcing our commitment
towards quality products
and service excellence.

The image features a close-up, high-angle view of a large pile of coiled rebar. The rebar is dark, possibly black or dark grey, and has a prominent ribbed texture. The coils are stacked in a way that creates a sense of depth and volume. A large, solid blue geometric shape, resembling a stylized 'L' or a corner, is overlaid on the right side of the image. This shape contains the text 'Our Strength is your Stability.' in white. The overall composition is industrial and emphasizes the strength and stability of the rebar.

Our **Strength**
is your **Stability.**

NJR Steel's reinforcing mesh is manufactured from hard-drawn wire and deformed cold-rolled wire with a minimum ultimate tensile strength of 510 MPa. It features a unique deformed wire pattern, known as the curry pattern, which facilitates superior bonding, stress-distribution and crack-width control.

Our reinforcing mesh is made according to SABS standards (SANS 1024:2012). Reinforcing mesh is 2,4 x 6 m in length, but we can size it to customers' specifications when required. All wire is hard-drawn according to SABS standards and tested as per SANS 920:2011 and SANS 6892-1:2010. Wire can be supplied in coil form, ranging from 500-3000 kg or in lengths from 200-13000 mm.

NJR Steel branches stock quality wire and wire products for the construction industry. Like reinforcing bars (rebar), reinforcing mesh is embedded in concrete to add the necessary degree of tensile strength to support large loads; the two materials are almost interchangeable in vertical and horizontal structures. Mesh, however, differs from rebar in that it may be used to shape structures at the same time as supporting them, but is disadvantaged by an inability to be anchored to the ground.

REINFORCED
MESH

STEEL CUT TO LENGTH

NJR Steel branches offer an on-site cut-to-length service for all long steel products, and our trained staff ensure that each length is loaded swiftly and safely onto our customers' vehicles.

In order to meet the diverse needs of the industry, as well as catering for the continuous improvement in manufacturing technology and innovation, NJR Steel places major focus on the ongoing upgrading of both skills and capabilities.
