# UK Vehicle Registration Year Guide

The vehicle registration year guide is used to identify the year your car was first registered, helping to easily identify the correct replacement Ring bulb.

## Prefixed letter number plates

Number plates with prefixed letters ran from 1983 to 2001. The year of registration for your car can be identified using the left hand letter on your number plate.

# Rapid Response Bulbs

## Gain time, gain distance, avoid rear end collisions

- Faster light-up\* and greater light intensity provides earlier warning to following vehicles
- A shorter, more precise filament produces up to **20% more luminance** than a standard bulb
- Up to 3 metres\*\* extra stopping distance

\*Based on travelling speeds of 62mph

\*\*Up to 3 metres applies to brake and tail and brake bulbs only.

# Long Life Bulbs

## Lasts up to 3x longer than the standard equivalent bulb

- Ideal for day and night use and high mileage drivers
- Improved resistance to vehicle overvoltage
- Suitable for vehicles with optional 'lights on' function or daytime running systems

### Coping with Overvoltage

On many of today's modern vehicles the measured voltage can be higher than 12V in order to cope with the additional electronic devices and electric motors.

Bulbs for cars are currently manufactured to operate at 12V and tested at 13.2V however, if the constant running voltage is higher than this it can result in a rapid decrease in the life expectancy of the bulb. Ring Automotive's Long Life bulbs provide a better resistance to vehicle overvoltage.

# Bulb Changing Hints & Tips

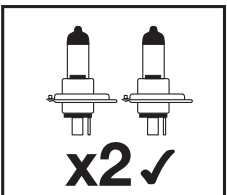

Failed bulbs may be pointed out by other road users. But be sure and safe by checking your lights are correctly working on a regular basis.

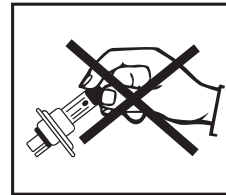

Consult the vehicle handbook for the correct bulb replacement specification and fitting instructions specific to your vehicle.

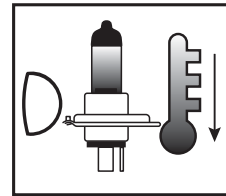

Switch off lights & ignition before replacing any bulbs (for HID bulbs ensure fuse is removed). Ensure the vehicle is parked in a safe location, off the road with the vehicle handbrake on and where your personal safety is not at risk.

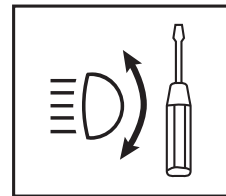

For best results always change bulbs in pairs to avoid any difference in light colour and brightness.

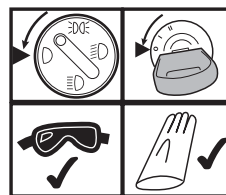

When changing headlight bulbs do not touch the glass. Replace holding the metal base only. Should you touch the glass clean with methylated spirit.

Allow the bulb to cool before replacing.

When the replacement bulb has been fitted check all components have been properly replaced. If headlamp bulbs have been replaced check the headlamp alignment.

## Safety first

Always ensure the ignition and all lighting is switched off. Safety goggles & gloves are recommended.
