

Why Global?

At Global we understand you have a lot of choices of partners when it comes to entrusting your fire and life safety needs. We believe there are a few key differences that set us apart from our competitors, allowing us to truly be your partner. Together with our associates, we seek to serve the needs of our customers to provide the personalized attention to projects and details that ensures our customers are satisfied with the end result.

Our Vision

Global is more than a name, it's how we think. We are a growing group of associates always striving together to meet customer needs, while maintaining the health of our company. Our passion for customer service shows in the urgency with which we treat our customers' requests.

Our Mission

Delivering exceptional service, on time, every time.

Education

Colleges & Universities | Primary & Secondary

Education facilities encompass classrooms, labs, auditorium, administration, and dormitories among other unique occupancies and challenges. With high occupancy areas primarily occupied by youth or young adults, specific areas of challenge come in protection, notification, and evacuation.

Our engineering analysis and design experience aids in ensuring that the project design team has what it needs to provide the appropriate protection standards in place, notification is efficient, and planned movement is defined. Our work in the areas of systems design, Engineering Judgements review, plan review, and systems commissioning round out a comprehensive and secure approach to life safety.
