

Why Global?

At Global we understand you have a lot of choices of partners when it comes to entrusting your fire and life safety needs. We believe there are a few key differences that set us apart from our competitors, allowing us to truly be your partner. Together with our associates, we seek to serve the needs of our customers to provide the personalized attention to projects and details that ensures our customers are satisfied with the end result.

Our Vision

Global is more than a name, it's how we think. We are a growing group of associates always striving together to meet customer needs, while maintaining the health of our company. Our passion for customer service shows in the urgency with which we treat our customers' requests.

Our Mission

Delivering exceptional service, on time, every time.

Energy & Power

Nuclear | Coal | Hydro

NFPA 850, Recommended Practice for Fire Protection for Electric Generating Plants and High Voltage Direct Current Converter Stations, is the standard to which most electric generating plants are constructed. Chapter 4 of NFPA 850 requires a fire protection engineer to conduct a Fire Protection Design Basis Report that evaluates a facility's layout and hazards. This report analyzes all fire protection features, including: adequacy of the existing water supply, specific method for automatic fire extinguishing protection (if any), locations and extent of fire barriers, fire alarm system requirements, and method of protection for unattended facilities.

Global Services Highly Suited to Meet Your Needs

- Engineering & Consulting Services
- Engineering Judgements
- Third Party Inspection Services
- Active Fire Protection System Design
- Passive Fire Protection System Design
- Water System Modeling
- Hazard and Risk Management
- Life Safety
- Detection System Design
- Fire Barrier Audits & Management
- Systems Commissioning Services
- Loss Control Services
- Litigation Support & Expert Witness Testimony
