

Why Global?

At Global we understand you have a lot of choices of partners when it comes to entrusting your fire and life safety needs. We believe there are a few key differences that set us apart from our competitors, allowing us to truly be your partner. Together with our associates, we seek to serve the needs of our customers to provide the personalized attention to projects and details that ensures our customers are satisfied with the end result.

Our Vision

Global is more than a name, it's how we think. We are a growing group of associates always striving together to meet customer needs, while maintaining the health of our company. Our passion for customer service shows in the urgency with which we treat our customers' requests.

Our Mission

Delivering exceptional service, on time, every time.

High Rise

Mixed Use | Commercial | Residential

Special fire protection features for a high-rise building often include emergency generators, fire pumps, voice evacuation fire alarm systems, fire service access elevators, occupant evacuation elevators, multiple fire sprinkler standpipes and supplies, stair pressurization, and smoke control systems. Jurisdictions typically require a Fire Protection Engineering company such as Global to submit a Fire Protection Report that details the approach to fire protection and building code features for a high-rise facility.
