

## Why Global?

At Global we understand you have a lot of choices of partners when it comes to entrusting your fire and life safety needs. We believe there are a few key differences that set us apart from our competitors, allowing us to truly be your partner. Together with our associates, we seek to serve the needs of our customers to provide the personalized attention to projects and details that ensures our customers are satisfied with the end result.

## Our Vision

Global is more than a name, it's how we think. We are a growing group of associates always striving together to meet customer needs, while maintaining the health of our company. Our passion for customer service shows in the urgency with which we treat our customers' requests.

## Our Mission

Delivering exceptional service, on time, every time.

## Retail

*Stand Alone | Mall | Ground Up | Takeover / Renovation*

Occupants of retail environments, such as malls, are typically awake and are able to quickly respond to a fire emergency but are not always familiar with their surroundings. Retailers will often load merchandise in a manner intended to attract consumers, at times resulting in a slightly higher fire hazard scenario. Additionally, with higher occupant loads comes greater potential for income.

Because of their unique hazard and high occupant load, special construction features may be found in the design of large retail or mall facilities. These include non-combustible construction, additional exits, passive fire and smoke control systems, emergency voice communication systems, and a minimum common egress path of 20 feet in width. Global looks at these and other areas of concern to determine the most cost effective solutions to a planned project. Additionally, we look at zoning of systems for planned tenant spaces, water line service sizes and fire authority access.

## Global Services Highly Suited to Meet Your Needs

- Size Due Diligence Services
- Engineering & Consulting Services
- Fire Suppression System Design
- Fire Alarm System Design
- Plan Review Services
- Systems Testing Services
- Training Services
- Due Diligence/ Site Investigation
