

Why Global?

At Global we understand you have a lot of choices of partners when it comes to entrusting your fire and life safety needs. We believe there are a few key differences that set us apart from our competitors, allowing us to truly be your partner. Together with our associates, we seek to serve the needs of our customers to provide the personalized attention to projects and details that ensures our customers are satisfied with the end result.

Our Vision

Global is more than a name, it's how we think. We are a growing group of associates always striving together to meet customer needs, while maintaining the health of our company. Our passion for customer service shows in the urgency with which we treat our customers' requests.

Our Mission

Delivering exceptional service, on time, every time.

Federal Government

DOD, DOE, DOS, and Port Authorities

Government sites and facilities present a unique challenge in fire protection and life safety. How do you maintain consistency of the highest level of engineering services across the entire globe, with such a wide range of hazards at each facility? You need a firm that understands the complexity of the multitude of government standards and approval authorities modified to suit the facilities geographic location and climate conditions. All while complying with the specific branch of governments regulations and laws.

Global's extensive experience navigating these issues and developing solutions such as unique detection and suppression systems, to mass notification systems to individual staff life safety give us the expertise needed for the project.
