

Provider Agreement Attachment A

Medication Dispensing System is an automated medication dispenser that allows a consumer with medication compliance problems to receive pill form medications at appropriate intervals through audible/visual cueing. This system organizes a pre-filled supply of pills and is programmed to deliver the correct dosage of medications when appropriate. The product is lockable and tamper-proof and has a provision for power failure.

The Medication Dispensing System shall be authorized only when a responsible formal/informal caregiver can demonstrate the ability to pre-fill medications and monitor the system. The provider must furnish detailed instructions to the caregiver regarding the operation of the system, as well as a signed, written agreement between the provider and the caregiver clearly delineating the responsibilities of each party.
