Many customers we serve in the U.S. either already have facilities in Mexico or are planning to open them. These companies consistently prefer to purchase metals from a known and trusted supplier, such as Olympic Steel. In many cases, when the purchasing entity is a newly established Mexican company, they actually need to buy from a Mexican entity like ours, due to tax-related requirements.

Products originating in the U.S. can be imported and sold locally to support our U.S. based operations. The Mexico operation acts as the Importer of Record, which allows them to supply material from any part of the world. The operation is registered under the IMMEX program, which enables U.S.-based companies to purchase material without paying the VAT associated with the product (16% on product value).

Materials Available

- Round Tubing
