

RYERSON

ryerson.com

From its modest start in 1842, Ryerson has grown into a comprehensive network of warehouses, service centers, and facilities, equipped to meet any metal need. The company has demonstrated resilience through significant events such as the Great Chicago Fire and various economic downturns, evolving alongside changing markets.

Ryerson became one of the first distributors of stainless steel shortly after its development in 1913, showcasing our commitment to innovation. In the early 20th century, we proudly supplied steel to the Ford Motor Company, further establishing our role as an industry leader. Our dedication to progressive values was evident in 1957 when we published an Equal Opportunity Policy, well before it became a legal requirement or common corporate practice.

By the late 1960s, Ryerson had established itself as a major distributor of steel products, emerging as the nation's leading aluminum distributor while also being a significant dealer of plastics. In 1986, Inland Steel acquired another distributor, the Atlanta-based J. M. Tull, further expanding our reach.

In 2005, Ryerson acquired Integris Metals further enhancing our capabilities and inventory. Today, Ryerson has over 100 locations across North America and continues to expand the Ryerson Family of Companies, which includes Central Steel & Wire.

Beyond metal, Ryerson embodies a commitment to quality and service.

Ryerson stocks over 70,000 SKUs

STAINLESS STEEL

SHEET/COIL – COLD ROLL

Available Grades: 304/304L, 316/316L, 309, 430, 409, 410, 201, 301 and 2205

- Finishes – 2B, #3/#4, Blend S, Mirror, BA
- Protective coating available

PLATE

Available Grades: 304, 304L, 321, 316, 316L, 409, 201LN, 254SMO, 304H, 309, 310 and Nitronic 30

- 3/16" to 3" thick

BAR AND STRUCTURAL SHAPES

Available in 304, 304L, 316, 316L, 303, 416 and 17 – 4PH

- Round Bar: 0.125-20"
- Flat Bar: 0.125-3" thick, 0.5-12" wide
- Square Bar: 0.1875-3"
- Hex Bar: 0.25-2.75"
- Angles: 0.5-8" leg, 0.125-0.5" thick
- Channels: 1-15"
- Beams: 2-10"

PIPE: SEAMLESS AND WELDED

Available in 304, 304L, 316, 316L

- Schedules 10s, 40s, 80s, 160, XXH
- 0.25-24" OD, SCH5-80 Wall

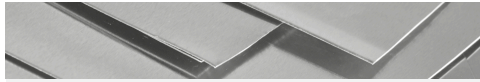

TUBING: SEAMLESS AND WELDED

- Available in 304, 304L, 316, 316L
- Round: up to 24" OD, Square and Rectangular: up to 12" OD

ORNAMENTAL POLISHED TUBE

- Round 3/4" to 2 1/2" OD

ALUMINUM

SHEET/COIL

Available Mill Finish Grades: 1100, 3003, 3105, 5005, 5052, 5083, 5086, 5454, 6061

- 3105 also available as embossed and painted
- 5005 also available as MAQ, GAQ, AAQ, and anodized
- 5454 also available enhanced and buffed

TREAD SHEET

Available Grades: 3003 and 6061

PLATE

Available Mill Finish Grades: 3003, 5052, 5083, 5086 and 6061

- 5454 also available enhanced and buffed
- Cast Tooling Plate also available. It has a machined surface

TREAD PLATE

Available Grades: 6061

BAR, TUBE, PIPE AND STRUCTURAL SHAPES

Extrusion Grades: 6061 and 6063

Cold Finish Grades: 2024, 2011, 7075 and 6061

- Round Bar: 0.125-16"
- Flats: 0.125-6" thick, 0.5-16" wide
- Pipe: 0.25-10" OD, SCH5-80 Wall
- Tubing-Round: up to 15", Square and Rectangular: up to 8"
- Angles: 0.75-6" legs, 0.125-0.5" thick
- Channels and beams: up to 12"

CARBON

SHEET/COIL – HOT ROLLED

Hot Rolled, HRP&O – special order on wide plate

- CQ, HSLA

SHEET/COIL – COLD ROLLED

- Many grades including CS-B, FS-B, DS-B, DDS, EDDS and others

SHEET/COIL – COATED

- Galvanized – G90, G40, G60, etc.
- Galvannealed – A40, A60, etc.

PLATE

- Grades include A36/SA36, A572 Grade 50, A516 Grade 70, 1020, 1045

BAR

Available in hot rolled, cold finished and ground in round, square flat and hex

- Cold finished grades include 1018, 1045, 1117, 1141, 1144, 1215, 12L14, Stress-proof™ and Fatigue-proof™ Rounds up to 6" OD, Hex up to 3" OD and Flat 0.125-4" thick and 0.375-12" wide
- Hot rolled grades include A-36, A-529-50 and A-572-50. Rounds up to 32" OD

STRUCTURAL SHAPES

- Angles, channels and S, W and M Beams

TUBING

- Available in round, square and rectangular shapes up to 14" OD
- Mechanical (ERW, DOM, seamless) and structural (A-500)

BRASS/COPPER/BRONZE

SHEET AND PLATE

- Copper and brass sheet and plate available
- C110, C260, 280-Muntz and other alloys

BAR

- Most commonly stocked as C360
- Available in round, square, flat and hexagon

ALLOY

PLATE

- Grades include AR400, A514, 4140 and 8620

BAR

- Available as hot rolled, cold finished, forged, annealed, Q&T and other finishes.
- Round: up to 32" OD, Flat and Square
- Stock 4130, 4140, 4150, 8620 and 4340 as well as other grades/conditions

TUBE

- Available in 4140

NICKEL PRODUCTS

SHEET, BAR AND PLATE

- Alloy 200, 400, K500, 600, 601, 800H/HT, 825, C276, C22, 718

PIPE AND TUBE

- Welded and Seamless

SCAN ME

TOOL STEEL

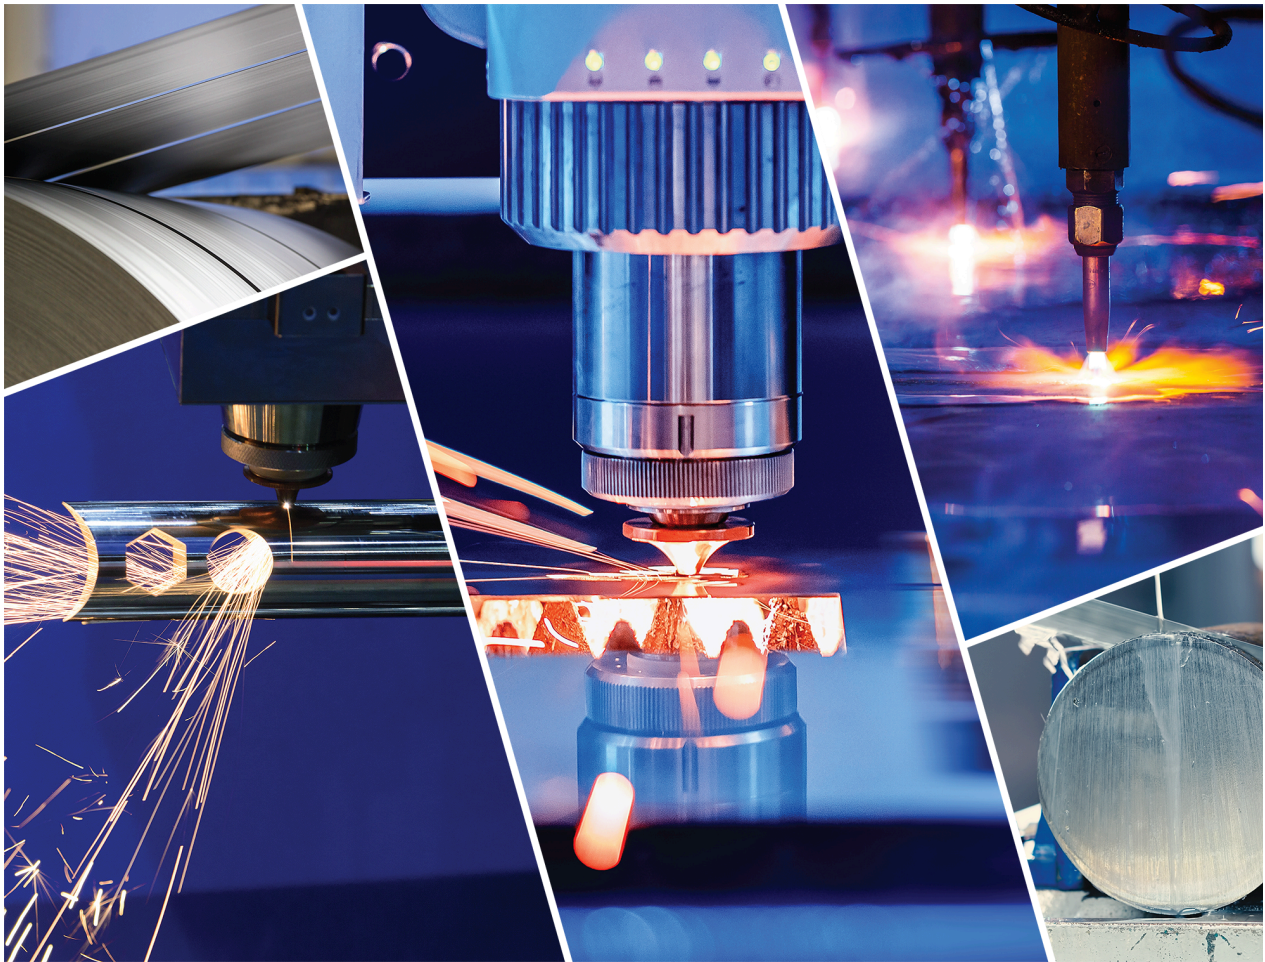

BAR & PLATE

- A2, D2, O1, S7, H13
- Includes Decarb Free

RYERSON

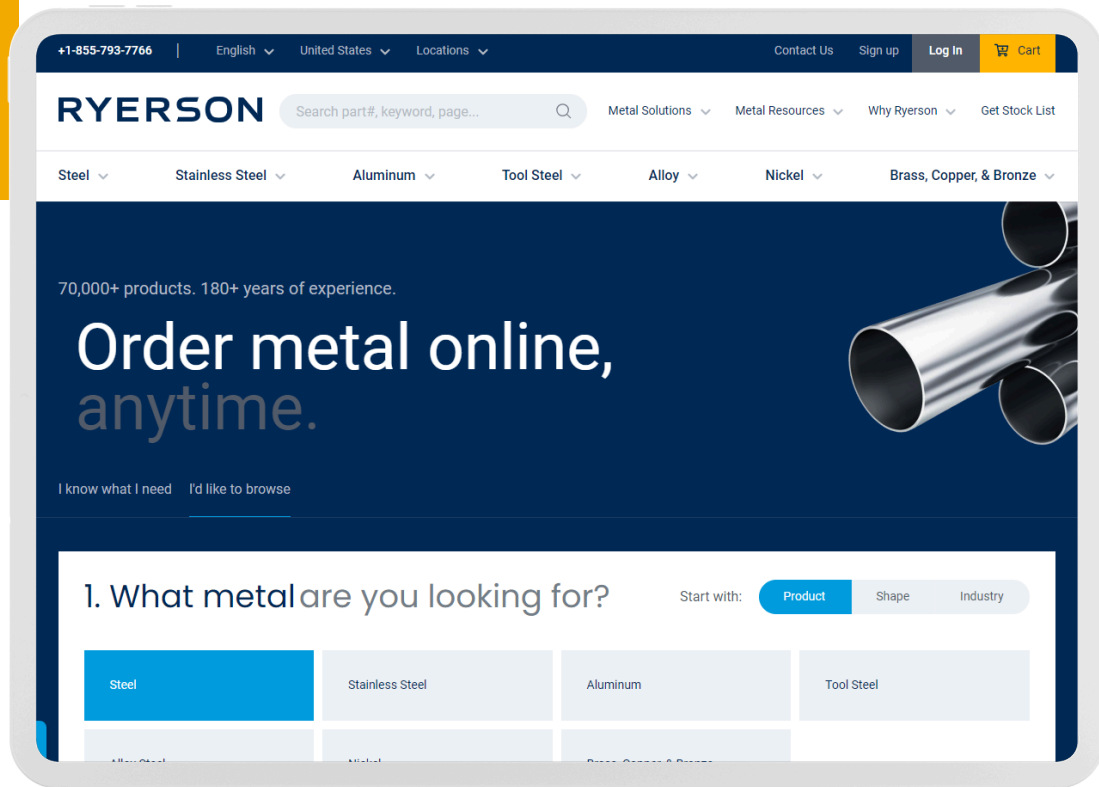

RYERSON ADVANCED PROCESSING

Ryerson Advanced Processing (RAP) combines over 182 years of metal expertise with an unwavering commitment to quality, making us your premier contract manufacturing solution. With one of the largest inventories of industrial metals and robust processing capabilities, we are equipped to handle a wide range of products tailored to meet your specific needs.

Whether you require simple components or complex assemblies, our advanced processing services are designed to add significant value to your business. Our expansive network of over 500 approved outside vendors ensures that we can provide comprehensive metal services, expertly managing your order from purchase order to final delivery.

As business cycles fluctuate, RAP is here to help you manage labor, capacity, and capital efficiently. Our resources simplify your supply chain and enable you to ramp up production to meet increasing demands. Together, we will find a customized metal solution that meets your needs. Ready to chat or have a quote? Contact us at rap@ryerson.com!

RYERSON

FAMILY OF COMPANIES

KNOWLEDGE. VALUE. EXPERTISE. IT'S ALL IN THE FAMILY.

The Ryerson Family of Companies comprises multiple brands, each bringing unique value and expertise to enhance our customer service. Through strategic acquisitions, Ryerson continuously strengthens its inventory and processing capabilities, allowing us to better meet the diverse needs of our customers. This approach ensures that we provide comprehensive solutions and maintain our position as a leader in the industry.

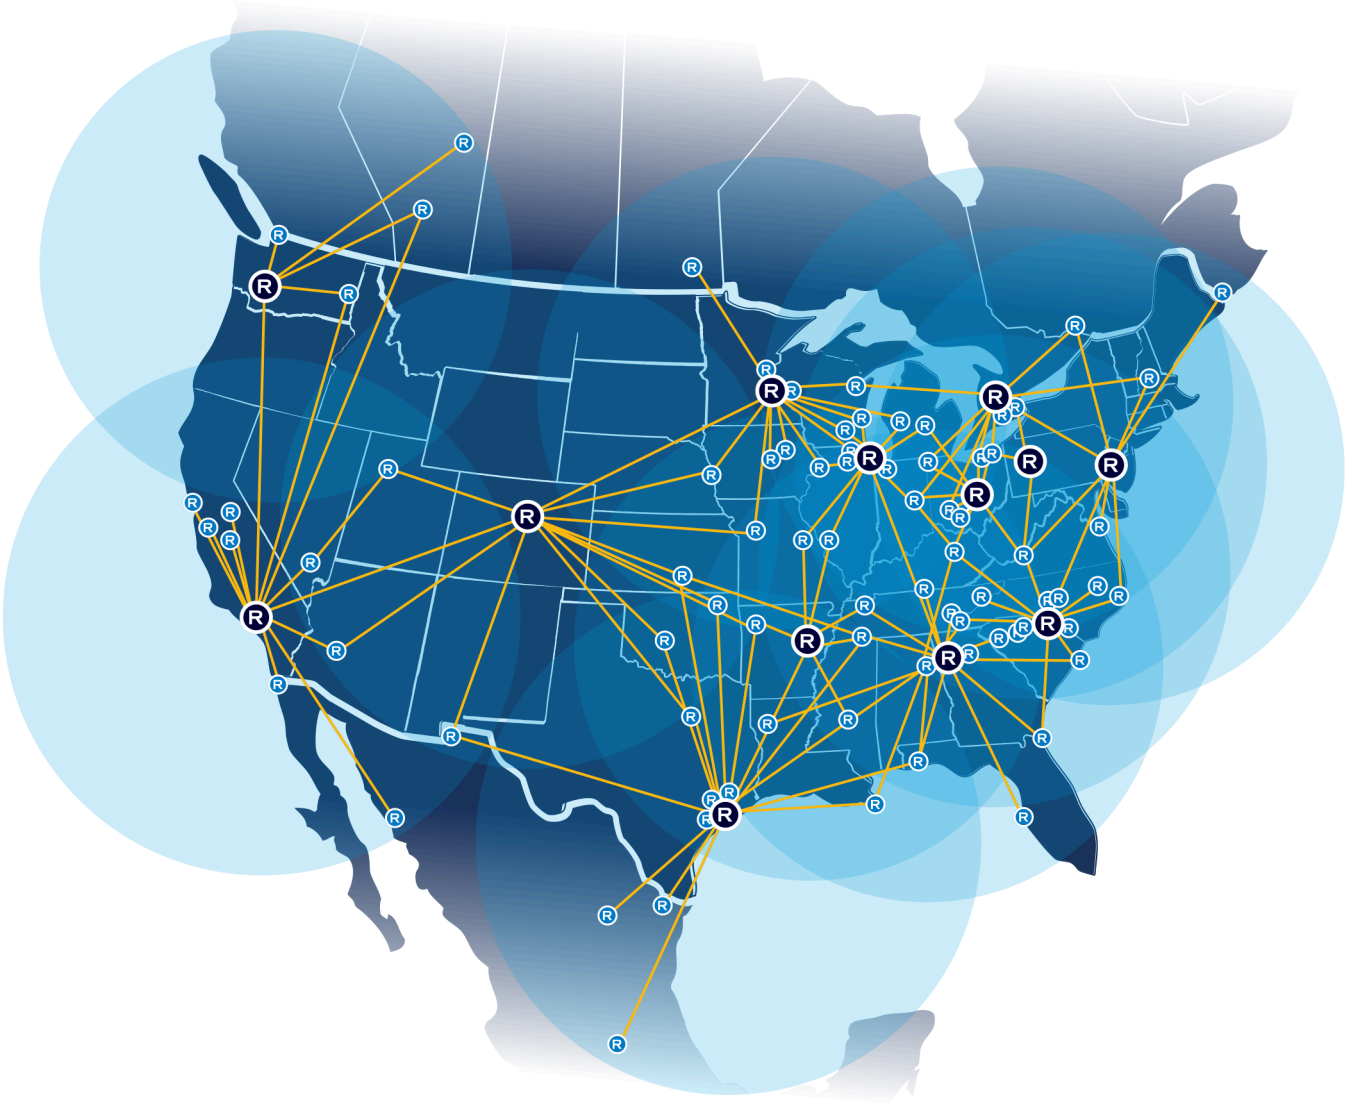

Welcome to Cup o' Joe, your go-to podcast for a fun and informative look at the dynamic world of metals! In each episode, we bring the latest factors influencing the price and availability of metals, led by the Director of Risk Management and Commodities Hedging at Ryerson, Nick Webb, and hosted by Mike Carrozzo.

Join us live the first Thursday of each month at 2:30 CT or listen wherever you get your podcast.
