**Structured levels. Clear progression.
Planned transitions.**

Level 3.7 – Medically Monitored Withdrawal Management (Detox)

24-hour medically supervised care focused on stabilization, safety, and rapid transition into the next appropriate level of treatment.

Level 3.5 – Clinically Managed High-Intensity Residential Treatment

Highly structured, 24-hour residential care providing intensive therapeutic programming for individuals requiring significant support and supervision.

Level 3.1 – Clinically Managed Low-Intensity Residential Treatment

Residential treatment offering structured programming with increased independence to support skill development and readiness for outpatient care.

Levels 2.1 & 1.0 – Intensive Outpatient and Outpatient Treatment

Community-based treatment providing structured therapeutic support with decreasing intensity as individuals transition to independent, long-term recovery.

The right level at the right time.

Clear placement with planned progress.

Project Turnabout provides structured levels of care with planned transitions, not abrupt discharge.
