

Aqua Cutter 410A Hydro Demolition Robot

The Aqua Cutter 410v is designed for confined space applications and replacing hand lance work. Its small, compact size and low weight allow the robot to easily pass through narrow passages, such as door frames, or operate from scaffolding.

Our unique 3D positioning system can perform wonders. The front power head allows the operator to reach all areas efficiently. The mast can operate at heights up to 4 meters without support and even more with support.

Total weight: 1190 kg (2756 lb)
Length: 2.1m (6.9ft)
Min. width: 0.78m (2.6ft)
Track width: 0.78-1.16 m (4,0 -6,0 ft)
Min. height: 0.99m (3.1 ft)
Operating height:: 3m (23 ft)
Side reach: 1.3m (3.1 ft)
Lance angle: $\pm 45^\circ$
Working width: 0-1.7 m (0-5.6ft)
WW extended: 0-3.2m (0-10.5ft)
Drive source: Electric Motor 3 Phase 5.5kw
