

D-Wall Hydro Demo

Project: Torrens to Darlington Tunnel Build

Client: Torrens to Darlington Alliance

Challenge:

The D-wall connectors had debris and poor concrete that hid the reinforcement, making assessment and construction difficult.

Solution:

Aqua Prep utilised precise hydrodemolition technology to remove material without damaging the steel reinforcement.

Outcome:

The hydro demolition revealed the rebar, confirming the structure's integrity. Aqua Prep finished early, demonstrating efficiency.

Benefit:

Hydro demolition maintained the integrity of the D-wall connector and left a clean surface for the next phase. It remains invaluable for challenging infrastructure projects.
