

## WGTP - MELBOURNE

CPBJHJV engaged Aqua Prep to expose old expansion joints for repair by hydro demolition. Scissor lifts provide a safe work platform for operators to perform the task efficiently.

Road plates installed above the expansion joints allowed work to be carried out during the day while maintaining live traffic flow overhead.

The use of scissor lifts, hydro demolition techniques, and strategic placement of road plates demonstrated the effectiveness of modern construction methods and ensured project efficiency, safety, and minimal disruption to the public, thereby assuring the project's success.
