Information Sheet

In addition to our services for direct cremation and direct cremation with a memorial service we also offer full traditional funeral services with cremation. We accomplish this with the use of a rental casket specifically designed with a removable inner container for cremation after the traditional funeral service. This enables the family to have the traditional funeral service with a public visitation and funeral service and still be able to comply with the deceased's wishes for cremation.

***The cremation rental casket is an oak casket that we offer for sale* at \$3,950.00 but the rental cost of the casket is \$975.00. When the rental casket is used, the deceased is taken to the crematory in the casket's inner container, which includes the blanket, pillow and inner casket throw.**

*** This container is similar to the container used for direct cremation * Following each rental of the casket we insert a new inner container with liner, blanket and pillow.**

***Please note that with a traditional funeral and use of the rental casket, all state* regulations for embalming apply. If we have to embalm, you will be charged for this service.**

***The inner container of the rental casket is made of cardboard construction and meets the crematory requirements for an alternative receptacle.**
