ALLEGIANT AIR EXPANDS SUMMER SERVICE AT ATLANTIC CITY INTERNATIONAL AIRPORT

Summer 2027 Schedule Brings More Than 90% Increase in Seat Capacity, Additional Flights to Florida and Myrtle Beach

EGG HARBOR TOWNSHIP, N.J. – Atlantic City International Airport (ACY) will see a significant increase in Allegiant Air service next summer, with the airline's newly released schedule providing more than a 90% increase in seat capacity compared with summer 2026.

Allegiant's summer schedule, which runs from approximately mid-May through mid-August, includes increased frequencies to several popular destinations as well as year-round service to Punta Gorda, Florida.

Under the new schedule:

- **Punta Gorda, Florida** will become a year-round destination with twice-weekly service.
- **Myrtle Beach, South Carolina** seasonal service will return with up to five flights per week, an increase from three weekly flights last summer.
- **Orlando Sanford, Florida** will increase from twice-weekly service to as many as five flights per week.
- **St. Petersburg, Florida** will increase from twice-weekly service to as many as three flights per week.
- **Fort Lauderdale, Florida** will increase from six flights per week to daily service, with as many as 12 weekly frequencies during peak periods.

"This is exactly the kind of growth we have been working toward at Atlantic City International Airport," said Stephen F. Dougherty, Executive Director of the South Jersey Transportation Authority. "A more than 90% increase in Allegiant's summer seat capacity gives South Jersey travelers more choices and more flexibility to fly from their local airport. Just as importantly, expanded service creates additional opportunities to bring visitors into our region and support the tourism, hospitality, and business communities that contribute so much to South Jersey's economy."

The additional Allegiant service continues ACY's efforts to expand and diversify its airline offerings while rebuilding capacity and providing South Jersey residents with convenient access to popular leisure destinations.

The increase in Fort Lauderdale service represents one of the most significant schedule changes, with service growing from six weekly flights to daily operations and reaching as many as 12 flights per week during portions of the summer schedule.

The return of expanded Myrtle Beach service and additional frequencies to Orlando Sanford and St. Petersburg will also provide travelers with greater scheduling flexibility during the peak summer travel season.

Making Punta Gorda a year-round market further extends Allegiant's presence at ACY beyond the traditional summer travel period.
